General Conference of Free Baptists, Hillsdale, Michigan

BATES COLLEGE

LEWISTON, MAINE

1910 - 1911

One hundred forty courses, largely elective, leading to the degrees of A. B. and B. S. Careful training in English Composition, Oratory and Debate. Thorough courses in Engineering. Excellent Laboratory and Library facilities. Up-to-date methods in teaching Languages, Ancient and Modern, as well as Economics, Sociology, and Philosophy. First-class Athletic Field. Central Heating Plant recently installed and Libbey forum opened for Literary Societies and Christian Associations during the last year. Hedge Chemical Laboratory enlarged. Moral and Christian influences the primary aim.

Elective courses in Hebrew History and Literature and in Christian Literature and Ethics (equivalent to those heretofore given in Cobb Divinity School), ensuring to Bates graduates who have taken them advanced standing in any theological school.

Necessary expenses for tuition, rooms, board, and all other College charges less than two hundred dollars a year. Steam heat and electric light in the dormitories. Year begins Wednesday, September 21.

ADDRESS

L. G. JORDAN, Ph. D., Secretary,
Lewiston, Maine

Addenda

To make a perfect year book is an impossibility. Changes are constantly occuring. Defective original reports, illegible writing, a slip of the pen or a metal combine to defeat absolute accuracy. This book is believed to be unusually accurate, but in some unaccountable way the name of a church. Morral, has dropped from under Marion, Page 30. This does not look so bad as the hundreds of churches with nothing to their credit for missions. What does Christ think of that?

Brazos County Q. M., page 54, belongs to the Central Texas Association below.

We note some recent pastorial changes since reports came:

M. C. Miner is pastor of the Gardnier, Me., church.

A. B. Hyde, page 23, is now pastor at Bangor, Me.

F. M. Buker has left Rhode Island. See page 19.

Arthur Muir is pastor at Sutton, N. H., page 19.

B. J. Lehigh, of Clayton, supplies Depawville, page 26.

E. H. Hobart is pastor at Otsdawa and W. Oneonta churches. Address W. Oneonta. Page 27.

A. Dewar has closed his work at Cowlesville. Page 24.

A. H. Nickell is pastor at Oelwein, Ia., page 45.

R. E. Benjamin is pastor of Geneva and Fairview churches, page 47.

Mr. Wright is pastor at Denton, page 47.

West Frank (Texas- association reports 18 churches, 22 ministers and 171 baptisms. Ministers not reported on page 55; W. E. Dearmore, Bowie, Tex.; J. A. Ford, Decatur; J. Melton, Marshal; G. W. Thompson, Coppell; J. M. Walker Weathersford; J. T. Martin Buchner; J. Cole, Beasser; M. M. Stone; Ruth Cooke, Pratville; T. H. Newman, Spungtawn; L. W. Pace; M. P. Holson; T. J. Easton, St. Joe; A. W. Roberts; B. Stump.

STATISTICS

One star (*) affixed to the name of a church signifies that no official report has been received.

Two stars (**) denote a colored church or Quarterly Meeting.

One dagger (†) shows that a preacher has been ordained or a church received the past year.

Pastors of churches have "p" affixed to their names. The names of unordained ministers are printed in italics.

The General Conference benevolent contributions are for the year July to July.

Those of the Woman's Missionary Society from September to September.

MAINE FREE BAPTIST ASSOCIATION.

ANSON QUARTERLY MEETING.

Note.—The name "Southwestern Missouri Yearly Meeting" is retained here for convenience, though since the reorganization into associations no such body is recognized. Whether after these changes the associations belong to General Conference would be a question for the Conference to decide. The returns for the Southwestern Association are too old to be absolutely trustworthy.

Executive Committee—R. D. LORD, G. F. MOSHER, T. H. STACY, S. C. G. AVERY, HARRIETT A. DEERING, L. M. WEBB, O. D. PATCH.

Communications intended for the Conference Board for its Executive Committee, and correspondence relating to general missionary interests should be addressed to the Corresponding Secretary, H. M. Ford.

FORM OF BEQUEST.

I give, bequeath, and devise to the General Conference of Free Baptists, a corporation under and by virtue of the laws of the State of Maine.....(here insert the amount, and state for what purpose the money is to be used.)

Legacies and donations are solicited for the following objects:

Foreign Missions department, for current work to be added to the permanent fund.

Home Missions department, for current work or to be added to the permanent fund; also for the Church Building Loan Fund.

Educational department, for current work to be added to the permanent fund; also for the permanent Library Fund, the income of which is used to aid our theological libraries.

The Ministerial Relief Fund.

REPORT OF THE CORRESPONDING SECRETARY.

Foreign Missions.—India.—Since the issue of the last Year Book (1909) Dr. and Mrs. Kennan have returned to Bhimpore, his former field among the Santals; has dug a well, erected a windmill and has piped the water to different quarters of the station. The hospital is nearing completion with a prospect of being finished by the holidays. Mr. and Mrs. Murphy are prolonging their furlough while he is pursuing medical studies at Lincoln, Neb. Mr. and Mrs. Coldren arrived home May 25th. His strength was seriously depleted and it will be some time before he is fit for service. Mr. and Mr. Griffin have also come home. Miss Dawson has married during the year and removed to another station and Miss Bomwetch has resigned. And Mr. and Mrs. Oxreider are due to come home in the spring of 1911 for a needed and well earned rest. Mr. and Mrs. Collett, who had gone to Santipore to fill the vacancy made by the resignation of Mr. and Mrs. Griffin, must again remove to Kharagpur if no one is found to send to Kharagpur, and Santipore will suffer seriously in consequence. Contai and Chandbali are cared for by native Christians. The working force at Balasore has been augmented by Dr. Mary Bacheler, who removes from Midnapore, and by Amy Coe and Sadie Gowan, who went out last year. In September, 1911, Harold Frost, Misses Schermerhorn, Doe and Rich are expected to sail for this mission. They are all promising and capable young people.

The material and spiritual results of our India mission field compare most favorably with those on any mission field in India, and are enough to inspire and quicken the pulse of the most indifferent and lukewarm. No other enterprise, material or otherwise, has begun to pay such dividends. The sacrifice of lives, money and effort on our foreign field for seventy-three years has been none too great nor precious if we compare them with the results obtained. Out of such sacrifice have come organized evangelistic work, strong churches nearing self-support, Sunday schools, educational institutions, dispensaries, orphanages, native teachers, preachers and evangelists, substantial buildings and immeasurable influence with the natives and confidence of the government. It may not be generally known that we have a force of nearly 300 persons giving all their time to spreading the gospel message and telling the old, old story—it is a busy place. This has been a year of building and solid growth and evangelistic success; many have been added by baptism, thousands of books have been sold and tracts given away and hundreds are eagerly inquiring the way of salvation. As never before the realization of our business and covenant obligation to sustain this enterprise comes home to our bosoms.

But 550 churches—containing 30,000 members actual count—are supporting our foreign missions, while a large fraction are literally giving not one cent. We are in desperate need of money and missionaries to do the work crowding upon us and to enter the doors opening to us on our fields. However, it is an encouraging sign when churches and Sunday schools and individuals are undertaking the support of a missionary or native worker.

One cent a day for missions on an average for every church member in *every church,* is the one plan that would furnish us with ample funds for our work. Our church was never more honored or favored than it is in these days when it is entrusted with the commission to give the gospel to this anxious people who are now begging for it. The conviction grows among the nations that Christ's religion is the next great religion to become universally accepted in India. Blessed omen. Let us hasten its realization.

Africa—Since our last issue of the Year Book Clinton has come home on furlough from Africa—was present at our General Conference at Ocean Park, and since that time has been doing deputation work among the young people of Maine, after which he is supposed to visit a number of the yearly meetings and associations before returning. Evidently our mission in Liberia presents a vast opportunity to our people. Special prayer should be invoked for this branch of our work.

REPORTS FROM THE HOME FIELD.

Home Missions—State Agents—It has been proven beyond any reasonable doubt that the state agent policy with us is no mistake. The state agent is a kind of two-legged providence, going "hither and yon" when needed and arrives where needed. He is entitled to the credit of doing a large home mission work among us—on the frontiers of his state so unostentatiously that little noise is made about it. God bless him.

The Southwest—A great field lying partly in Texas, in Arkansas and Oklahoma, 600 miles across it, lies at our very feet for religious experimentation and unprecedented and illimitable opportunity. It is ours. We have now 16 associations in this territory making up the Southwestern Free Will Baptist Convention. A splendid start. Religious workers of experience are needed to gather up, organize and still carry on evangelistic and missionary operations.

Our Schools.—Stover College—The numbers who come to this school multiply. Facilities for caring for the increasing numbers are being provided, but they are not yet sufficient. The new Lincoln hall is a model in convenience and architecture and is simple and substantial. One notes the improvements being made from year to year. Prof. N. C. Brackett, whom no one ever knew but to love and admire for his devotion to and the ability he brought to a cause for which he gave 45 of his best years, has departed and his familiar form will be missed. Men die, but God's work goes on.

The Manning Bible School—This school has survived its first decade, and under A. J. Herron as principal is still prospering. A good deal of interest is taken in the school by the colored people of the Cairo mission. Death has removed a graphic and picturesque figure from Cairo, one who, from Father Manning's day, has been a man conspicuous in religious and denominational work—Rev. Nelson Ricks, who was pastor of one of our churches in Cairo for 40 years.

TREASURER'S REPORT.

Report of the Treasurer of the General Conference of Free Baptists for the year ending June 30, 1910.

ANNUAL REPORT OF THE

American Free Baptist Missions

of South Bengal, India and Liberia, Africa

FOR THE YEAR ENDING
SEPTEMBER 30
1910

Report of the American Free Baptist Mission

PROSPECTUS.

He is a poor interpreter of the spirit of Jesus who scolds his congregation for the shortcomings of those not present. I am not skeptical as to the indifference of many who ought to read this report, and to go down deep into their pockets, and wear the skin of their knees thin in consequence. But as I am sure they are not in my congregation, and are not likely to come into it, I want to say a few words to the good, loyal friends who will read it. Some other means will have to be used to capture the multitude outside.

Dear friends, do you remember the words of Judson, "The prospects are as bright as the promises of God?" They were written when things looked dark enough to daunt the bravest spirit, but he refused to be daunted. Come, let us join his company.

I have written "prospectus" at the head of this with design. Prospectus, even in its English dress as "prospect," means a look ahead. It is true that this report, like all its kind, is a look back. And again, like mnay o: its kind, it is not altogether inspiring. I would not wonder if a reading of the pages that follow might give blended impressions; but one of them is sure to be a feeling of depression, possibly even of failure. But I believe that not one of you who read will get the impression that those of us who "are alive and remain" have been lying down. Such failure as appears is rather failure to accomplish our ends, failure to attain our hopes, from some weakness of flesh or spirit, or, what is far more disheartening, failure of the reserves to move up to support the advance.

But "prospectus" I have written, and a look ahead is what I want to show you. It is just as true for us as it was for Judson that the "Prospect is as bright as the promises of God." Our field has been cultivated till the bright shoots of green are beginning to appear all over it. They are scattered, to be sure, but what more could be expected with our scattered forces? But they are here, and they increase in number every year. Perhaps I might better remind you of the words of Jesus to his disciples, when they could see nothing but outcast Samaritans: "Lift up your eyes, and look upon the fields, for they are white already unto the harvest." That is becoming more true of this field every month. Oh, for laborers! laborers!! laborers!!! And mind you, that does not mean that you must come here before you can labor.

Think a moment! Perhaps you have thought that you must come here in order to labor for India. Think again! Did you never see 2 Cor. 1:11? "Ye also *helping together* on our behalf by your supplication." And what about the word of James, "The supplication of the righteous man availeth much *in its working*"? (Jas. 5:16 R. V.). My dear brother, sister, perhaps you have not a cent in the world you can spare. Perhaps you think yourself utterly shut out of this great work of gathering in the souls for Jesus. But you are as much mistaken as it is possible to be. With the prayer-door

wide open into the presence chamber of God, what more can you ask as an opportunity. And if you will enter, truly enter, this wonderful door, then you can help as much as any one on earth to establish the kingdom of Christ here.

For after all, the greatest hindrance is the Hinderer, the "Accuser of the brethren,' "That old Serpent," the "Enemy that soweth the tares while men sleep." And the only way to bind him is to chain him by prayer. So the prospect depends on you, who read this, as much as on us. You will do your part, won't you? We mean to do ours.

What are you to pray for? For whatever you are led to pray for. Study this report. Do not simply read it, but study it, and pray as you study. Pray that we may have more faith, hope, love, courage, strength, aggressiveness, prayerfulness. Ask the same for the Christians here. Ask that the timid believers all around us may be given such a vision of Christ that they shall dare all for Him. Pray for all the things that you know will make for the establishment of the kingdom here.

And remember that, if you read it right, this report is full of hope and cheer; for "The prospect is as bright as the promises of God."

GEO H. HAMLEN.

Miss Ellen Chundra, B. A., Lady Superintendent of Training School.
Seven Bible-Women. Two Colporters. Teachers.

REPORT OF G. H. HAMLEN.

Church.—Nothing of special note has occurred in the church during the year. There has been real growth in some ways, and there are things to make us rejoice. The opposite things are also present, and more than once has our rejoicing been without trembling. I think that the most marked progress has been among the children, the boys and girls. Most of the baptisms have been from among them, and they are becoming more intelligent in their faith and service.

It is a pleasure to record the faithfulness of the pastor and of a number of the brethren and sisters. There are some young men, than whom it would be hard to find more faithful attendants at the meetings. And they are not silent partners, either. We look for an increase in their numbers. Indeed, there is now, I think, a greater longing for fresh power, and deeper experiences of the presence of God, than for some time.

Evangelistic Work.—Because I had to say "go" and other duties have precluded my saying "come" to preachers, the amount of evangelistic work during the year has not been up to the former mark. But last cold season Mrs. Hamlen was able to go out with them on several tours, which she has reported briefly. Since their return from the last tour, there has been some preaching in the bazaar. But the one evangelist in Balasore itself who could go has disliked to go alone, and so I have kept him busy as I could with literary work, at which he is good.

Colportage.—Of the six colporters reported last year, three have been dropped for immorality, greatly to our sorrow. Another has been sent to Bhadrak, and one resigned. Another has been taken on, so that now there are two. But recently some of the boys in the orphanage have gone to selling books, and they do better than even the regular colporters. So the sales of books have been fairly good. This is one of the most promising branches of the work, for the books sold go where we cannot, and preach and teach where nothing else wearing Christian garb would be allowed.

Bampada.—The work in this village has gone on about the same. There are three new members of the church there, Krushna Das' father, his daughter, and his niece. Considerable opposition to our work in the village has been manifested, evidently because some of the people were becoming too interested in the things of Christ. But this may be only temporary.

The school there has been something of a trial to me. The teacher was not satisfactory to Christians or Hindus, and she herself, with her husband, were full of complaints that they were not well treated. Finally I

removed her, and was meditating the application of the "closure" of the school. But a young man here was willing to take it for a time, and I have let him try. He reports reviving interest. It may live even yet. I hope so for the sake of the Christian children there. And it will help the Hindus, too.

Krushna says that there are two or three Hindus and a Mohammedan who are convinced of the truth, but so far have not had courage to confess their faith openly. He is hopeful of them. A little opposition, perhaps a large amount of it, they could stand, but to be in fear of their lives if they confess Christ, is too much for them yet. I hope you will stop here a moment to pray for them.

Christian Endeavor.—The Christian Endeavor idea has taken deep root in Balasore. There are no less than eight societies, seven in Oriya, and one in English. This may seem rather bewildering to friends at home, but it is all simple enough. You must remember that, according to the customs of the land, boys and girls have to keep by themselves. That necessitates two societies of each grade, one for each sex. And there is an extra one for the older boys, who have one to themselves, instead of going into the young men's society. These societies all hold weekly meetings, and in them our boys and girls and young people are getting some good training in Christian work. Occasionally they plan a rally for all the societies, and even when it lasts two hours, they seem to enjoy it.

Nearly all the societies have a missionary or some older Chirstian to look after them. I have the older boys, and Mrs. Hamlen the middle sized ones, and the little fellows have one of their teachers. I have enjoyed this part of the work, but sometimes wish that I had more time to devote to making plans for it. I believe it is as important as any part of our work. Four were baptized in this society this year.

Seven of us had the great privilege and pleasure of attending the World's C. E. Convention in Agra last November. Five of the number were young men of the church, including its pastor, superintendent of the Sunday School, a deacon and two preachers. It did us all good, and the memory of those days will always be an inspiration to us.

Sunday Schools.—The Sunday School work continues to prosper. Our main school keeps its numbers and attendance about as last year. The teachers' class is held immediately after the school on Sunday morning, and attracts most of the men teachers. Somehow the women, though they need it most of all, cannot be persuaded to make much us of it. Perhaps in the better days coming they may do better.

The same is true of the teachers' prayer meeting on Tuesday evening. I am sure that it does us all good who are there, and sometimes, by offering the lure of "something to eat," we have been able to get nearly every teacher to come. Do you see any resemblance to schools, or rather to teachers, that you know? Yet even that has been a gain.

A larger number than ever before took the All-Indian S. S. examination this year, and the percentages of passes was the highest that we have ever had, I believe. Indeed, this was true of the whole of Orissa, and is a gratifying sign that the work of the Sunday schools of our mission and of the sister English Baptist mission to the south of us, is gaining in depth and value.

The Sunday schools in connection with the Hindu girls' schools have been carried on by the teachers as usual. The little ones of the church have a Sunday school of their own in the kindergarten. There is no part of our work that is more full of promise for the future. And I am convinced that one of the easiest ways to win India is through this teaching the truths of the Bible to the children.

Hindu Girls' Schools.—When Miss Dawson left us in June, to become Mrs. Grimes, the Hindu girls' schools came into my hands. There has

been little change to note in them. The teacher whom Miss Dawson reported as having gone to Matsahi was afterwards changed to Permit Ghat, and a young woman who had been in the training class but failed to pass was put into the Matsahi school. This could be done, because the head teacher there is one of our Christian women, a neighbor of the other. The work of the schools keeps up to about the same standard as before. The same is true of the Book Room school, which has just been given a grant-in-aid, as the teacher tells me. This will put it on the same footing as the other schools, I think.

Russell Memorial, or Church Lane School.—This school has had another prosperous year. The increasing number of pupils has compelled us to put in another teacher, so that there are now three men. I think the school is the largest of its grade in the city. There are many Hindu boys in it, and the teaching is good. It is a great feeder of the lowest class of our high school. I am very gald that all the teachers are Christian men. The head master, James Singh, has charge of the little boys' C. E. society, and has them every Saturday afternoon at the close of school.

Training School.—For six years this school was in the hands of Miss R .D. Bomwetsch. She also had charge of the kindergarten, which had grown to over one hundred pupils. The training school is to fit women for teachers, and there is a regular course, followed by a government examination and a certificate for those who pass.

In the early part of the year, there was a proposition from the Government Inspectress of Schools to unite the training school at Santipore with this one, and to give this one a much larger grant-in-aid. There was much regret on the part of some at the move, but when the situation was fully understood, there seemed to be no other way. The offer made by the Inspectress was very fair. So at the March meeting of the Indian Committee it was agreed to.

The necessary papers were sent in, and everything was moving along smoothly, we supposed, when, just at the close of a three-weeks stay in Darjeeling I received word that Miss Bomwetsch had left without notice. I could hardly believe it at first, but it proved only too true. I was able to see her the day that I left, she having arrived in that station. She had fully determined not to return to Balasore. So I took over the money and papers of the school from her. She had just received word that our application for increased grant-in-aid had been sanctioned, the amount being Rs. 120/—, on condition that we should have two classes, junior and senior.

Of course we had been proceeding on the supposition that Miss Bomwetsch would remain, and would be competent to look after the school with a good assistant. Her sudden resignation put us in a quandary. It had previously been agreed that Miss Gowen should take over the kindergarten, so that did not bother us. But who would carry on the training work? Miss Brock, the Inspectress, was very willing to help, and suggested to us a Bengali lady, Miss Ellen Chundra, B. A., as well qualified for the work. I need not tell the whole story, but Miss Chundra is in charge today, and we are all rejoicing over the change. She is a sweet-spirited Christian lady, with much earnestness, and excellent qualifications for the work. The change was of God, I believe.

It has not been possible to make satisfactory arrangements for the senior class, and there were so few to take that course that we have decided to abandon the idea of having one, for the present at least. That will involve a reduction of Rs. 25/— in the grant, but it will still be substantial. And there will be Rs. 50/— in stipends in addition to that. There are twenty or more in the class now.

I ought to say that eight were prepared to take the junior examination in July, and five of them passed. So we are beginning to get a few trained

teachers. I would be glad if we could have a similar school or class for men. There is need enough of trained teachers among the men.

Repairs.—At the time of my last report, I was carrying on the repairs at the Sinclair orphanage bungalow. After those were finished I had a brief respite, and then it became necessary to do some wholesale renovating of the premises there to put them into proper sanitary condition. At the same time a new thatched roof had to be put on the old dormitory there, and a new masonry roof on the school house. These repairs lasted till into June. Since then I have had another breathing space. I think that there cannot be any other heavy repairs very soon, for which I am grateful.

HIGH SCHOOL.

On the 30th of August occurred the annual prize giving of the high school. Mr. J. H. E. Garrett, C. S., Commissioner of Orissa, presided. I may explain that this gentleman is in charge of one of the divisions of the Bengal presidency. The missionaries were all present, and many of the gentlemen of the place. A number of boys recited and sang. Four languages were used, English, Sanskrit, Oriya, and Bengali. The prizes were distributed at the end of the exercises. I append entire the report read on the occasion. By remembering that three rupees equal about one dollar, you can understand the money values indicated.

At the close of the exercises, Mr. Garrett expressed himself as well pleased, and then went on to speak of the industrial school. He said that he had learned that it needed a paper cutting machine, for which he was glad to donate Rs. 200/—. You will see that our Lieutenant Governor had already promised that school Rs. 500/—. That is for an oil engine. This shows how our efforts toward industrial education are regarded, and the willingness of those in authority to help on that work.

The industrial school still has its grant of Rs. 100/— a month, and is doing good work, with room for improvement in all lines, as in most institutions. Its greatest need is for a working fund, perhaps $1,500 or so.

REPORT OF THE PRINCIPAL.

Mr. Garrett, Ladies and Gentlemen:—

It is with great pleasure that we welcome you here today. A prize giving is something of an event in the life of the school boy, and your presence on this occasion indicates that you are not wholly without sympathy for his feeling about it. History tells us that many a man has laid down his life more willingly to gain the approbation of an audience of his fellows. And it is certainly true that most of us do better when we know that some one is watching to give us approval. The boys and youth of India are not indifferent to this motive. Therefore we rejoice in the additional incentive to good work provided by your presence here at this time.

This school has been established sixteen years. Its beginning was very small. Only four pupils enrolled themselves the first day. There was only one teacher besides myself. At the end of the first six months there were only three of us. Of those three the Sanskrit pundit and myself are still in the school. The other teacher was the head master, Mr. D. N. Basu, B. A., who remained with us nearly three years the first time. Then, after an absence of six years, he returned in 1903, and remained till last June, when he resigned to accept a better position in another school.

At the first school we had only the four upper classes, because we already had a good Middle English school close by. But reasons of afficiency and economy led to the amalgamation of the two schools in 1897. Then for nine years the school had ten classes, including the lower primary grade. But in the beginning of 1906, in accordance with the new educational scheme

whereby the study of English begins at the end of the lower primary grade, the two lower classes were transferred to a little lower primary school which we had. The growth of that school, as well as this, proves the wisdom of the change. The two schools together now have double the number of pupils then enrolled.

The statistics for last year and this are as follows:

	1909.	1910.	Increase.
Number on the rolls March 31	165	196	31
Number of Christians	58	59	1
Number of Hindus	106	131	25
Number of Mohammedans	1	6	5
Average monthly number on rolls	139	169	30
Average attendance monthly	114	137	23
Number of candidates at annual exam	121	145	24
Number promoted	97	108	11
Receipts from mission treasury	Rs. 3522	Rs. 3312	(Decr's Rs. 210)
Receipts from fees and fines	Rs. 1757	Rs. 2247	Rs. 490
Receipts from grant-in-aid	Rs. 464	Rs. 480	Rs. 16
Total expenses of school	Rs. 5743	Rs. 6039	Rs. 296
Number of days school was in session	244	243	

These figures show that the school is doing a large amount of work at a reasonable expense. The cost per pupil is almost exactly Rs. 3/— a month, the increase in the fee income is particularly gratifying. Four years ago it was only Rs. 1052, so that it has considerably more than doubled in four years. This speaks well for the rapidly growing popularity of the school. The amount of the grant-in-aid is very small indeed for such a school. We hope, however, that it will be increased in the near future. The teaching staff now numbers ten, besides the principal. There have been several changes since the last report. Babu Upendra Mahanty left in October last to accept a better post, and his place was taken by Babu Lokenath Das, a former pupil of the school, with several years' experience in teaching. This post was called that of additional master, but it has now been made permanent. At the end of 1909 the second master, Mr. Sam Bose, B. A., left under similar circumstances, and a young Anglo Indian, Mr. Bruce E. Downes was appointed in his place. He left without notice at the beginning of June, and his place was filled by Mr. T. N. Sarkar, who is well qualified for the work.

At the beginning of 1910, the increase in the number of pupils so increased the work that Babu Nalini Ranjan Rai Choudhuri was engaged as additional master. In June his services were dispensed with, and Rev. M. M. Mundle, a successful teacher of long experience, was appointed additional second master. Finally, in June, as noted above, our head master resigned, and his place has been filled by the appointment of Mr. S. N Sarkar, B. A., who has had a number of years' experience in teaching. At present the school is well manned, and I hope to be able to report, at the end of this year, as great progress as ever.

Since its establishment, the school has sent up 63 candidates to the former Entrance examinations, and 3 to the recent matriculation of the Calcutta University. Of these 35 have passed, 19 Christians and 16 Hindus, The success of the school recently has been very good. Last year seven candidates were presented at the Entrance examination, of whom five passed in the second division, and one in the third. The remaining candidate was presented at the supplementary examination in December, when he passed in the third division. Last March three candidates were presented at the Matriculation, of whom one passed in the first divsiion, and the other two in the second. These are all Hindus. One of them is now attending college in Calcutta.

I may remark that the new system of examinations, which eliminates most of the possibility of cramming in the English papers, is distinctly favorable to our school, for it gives our effort to impart real education, and a working knowledge of the language, opportunity to bear its legitimate fruit.

No serious offenses against school discipline have occurred during the year. Morals and religion have been inculcated by teaching and example, and there are abundant proofs of the good influence of the school on its pupils. One of these proofs you will see in the good condition of the plants on the varanda and the garden in front of this building. I believe that none of our pupils have done any wanton damage to either, and very few flowers have been plucked by them. Another proof of the good the school is doing is in the gentlemanly behavior of the pupils, which has more than once excited favorable comment. They are self-controlled in their games, and polite on the street. I am happy to say that I am sure that very much of this is due to the real, personal interest which each teacher takes in his pupils.

We are gradually adding to our library books suitable for our boys, and now have some 360 volumes. It is gratifying that they are using it more than formerly.

Several new maps have been added to the school furniture, mostly geographical. A new blackboard for grapha has been purchased. The old benches and desks, having largely outlived their usefulness ,are being replaced by new ones as funds permit.

The pressure on the space in our class rooms became such that we had to remove the partition between two of them, and make one. Two classes are still in rather cramped space. I hope that can be remedied in due time.

We have been careful to see that boys from a distance are lodged in suitable places. The Christian boys are accommodated on the compound. A few Hindu boys live in a mess. The remainder are living with relatives or other approved persons as guardians. Still the need of a hostel for Hindu boys is pressing, as any one who understands their needs at all will admit. I have no promise of help for it ,but I hope to see one here large enough for their needs in the not distant future.

The importance of manual and industrial training is beginning to be recognized. The recent generous gift of Rs. 500 to our industrial school by our Lieutenant Governor, with the promise of Rs. 50 a month to it, speaks eloquently of his interest in that branch of education. We are glad to have the school on this compound, and to have quite a number of our pupils also enrolled in it. The District Board, and especially our district Magistrate, Mr. B. C. Sen, C. S., have been very generously interested in that school. But for their interest it could hardly have amounted to much.

There is also an agricultural garden connected with the school, which receives a grant-in-aid of about Rs. 25/— a month. A good number of the boys in the lower classes are receiving instruction in that garden, both theoretical and practical.

These are not large beginnings, I know. But they are beginnings, and given time and persistance, with such aid as is now given, and the future will show results of which no one need be ashamed.

It is wholly appropriate to remark that this high school was made possible at first by the faith in God of a few men and women who longed to establish a school as free as possible from the debasing influences so rife around us. They consulted together; they prayed; they gave of their scanty means; they interested others. Something of the result we see here today. But who shall see and record the good done to the hundreds of boys and young men who have passed through the school? Certainly only the pen of the recording angel can do that. But we cannot rest on our

oars, a vast work is yet to be done for the youth of India before she will be ready to take her place, her rightful place, among the great nations of the world. This school has its humble share in that work, and that share I believe it will perform more and more efficiently.

I take this opportunity to thank Babu Radha Charan Das, and Babu Monomatha Nath De for their kind contribution of Rs. 10/— each to our prize fund. Their generosity enables us to distribute today a number of dictionaries and other useful books which could not otherwise be provided. In conclusion, permit me, Sir, to thank you and our other friends for your presence here this morning. This is the third time in succession that our Commissioner has honored us. I am sure I may be permitted to hope that it will not by any means be the last.

GEO. H. HAMLEN, Principal.

REPORT OF THE PASTOR, BALASORE CHURCH.

I praise the loving Lord that He has again given me opportunity to report some of his work. For the past year I have again been pastor of this church. It is a matter of pleasure that the church has taken my full support. At the beginning of the year an assistant pastor, that is, a man to work for the church in extending the kingdom, was appointed. This was brother Probodh Chundra Nayak. After a while this brother was transferred to other work, but the Lord is using him to help the church and those outside. There is cause for praise in the way the church has continued to contribute for this purpose. It is to be hoped that this year the Lord will again fill the place with a man of his choosing.

The spiritual condition of the church is hopeful. Some of the brethren and sisters, especially some boys and girls, are making progress in the way of the Lord. And they are endeavoring to help spread the kingdom of the Lord in our country. It is a matter of regret that some of the brethren and sisters have not learned to help as they have been helped. When they learn to do so, they can do much for the Lord. There is hope that the Lord will soon fill them with his life.

In this church and city, because many means are being employed to spread the kingdom, and to help the brethren and sisters, the good results have begun to appear. There are various religious services about every day, such as Christian Endeavor meetings, prayer meetings, Sunday school, Sunday service, and services in day schools, kindergarten, training school, boys' and girls' orphanages, widow's home, etc. Also there are preachers, Bible-women, teachers and colporters to sow the seed of the word of the Lord. For these reasons I consider the spiritual condition of the church and city hopeful.

The missionary pastor of the church, Mr. Hamlen, and his good wife, Mrs. Hamlen, led by the mighty hand of the Lord, look after a part of the work mentioned above, and by doing good to Christians and non-Christians alike, are manifesting his glory. In addition to them, several other sisters from abroad are busy in many kinds of good work. The different kinds of work that are being carried on by the above-mentioned means I will mention briefly.

1. From among the Christian community a number have been baptized. You will find the number in the table of statistics.
2. The love of the Lord has been implanted in the tender hearts of many Hindu boys and girls, and in some of them it is taking root. I must write about one boy especially. There is a boy whose parents are Hindus, and his father is a zemindar (landlord). Formerly they hated the Christians. The boy came to read in the Christian high school and while here the seed of the Lord's love fell into his heart. Then he went back home and opened a little school in his own house, which he is now teaching. One day recently he sent word to the pastor of the nearest church, asking him to send a teacher to conduct a Sunday school for his children, and give then Bible teaching. Oh! Is not this the beginning of blessed results? Dear readers, will you not pray? O Lord Jesus, please send some one to teach those school boys and girls about Thyself. Amen.
3. Many of the boys and girls of the church are growing in worldly and spiritual knowledge.
4. The caste distinctions of our land, and the persecution and unjust opposition that used to accompany the preaching of the gospel are gradually disappearing.

In view of all this, we may say that the Lord's kingdom is at hand, though not yet fully come. But in the day when this church of the Lord shall fully receive Him, in that day He will make such a river of life flow out of the church that all the people of the country round about may be filled with the water of life, and find salvation in His name. Dear readers, do you wish to see that wonderful day, and to hear the wonderful news? Then come, let us pray, O Lord, open the eyes of the brethren and sisters of the Balasore church to see Thee. Thy will be done on earth as it is in heaven. Amen.

NATOBAR SINGH.

BALASORE SUNDAY SCHOOL.

I took charge of the Sunday School as superintendent from the beginning of January, 1910. Changes in the classes have been made with regard to age and seniority, as well as mental understanding and capacity. As the students are growing in knowledge, a good number of efficient teachers is providentially provided, such as we prayed for.

Our work is going on nicely, we believe, in answer to prayer, for we have a teachers' prayer meeting every Tuesday evening at our assistant superintendent's house. In addition to this we have a teacher's class usually every Sunday morning after Sunday school in the high school hall.

There are twenty-one teachers in our Sunday school, fifteen men and six women. The average attendance of pupils and teachers is about two hundred. Forty-five candidates were successful this year in the written examination.

Our Sunday School is not poor, but has a little money in hand at present. We are learning to collect money not only for ourselves, but also to help different branches of mission work.

U. N. MAHANTY.

MRS. HAMLEN'S REPORT.

Boys' Orphanage.—The boys' orphanage has had more changes than ever I knew in one year before, in numbers, in conduct, in everything. Some have been good boys, very good; some have been naughty, very naughty; some are repentant; some are still unrepentant; some have been industrious; some have been idle; some have been saving, some destructive; some have been studious, some inattentive.

We number today eighty-three boys and young men. My little ones of years ago are now young men. As I stood beside one of our boys yesterday, he said, "See, I am taller than you are." If they would only grow good as they grow tall! Some of them are more manly.

There are now three babies. One born about Mar. 18, is the youngest. His mother is living, but has three other children; so I pay her to keep him. Little Madhob is now a little more than a year old. It was the first of October, 1909, that I brought him with me from Bhadrak, then a wee little baby not two months old. I arranged with one of our Christian women, who had recently lost her baby, to care for him. She loves him dearly. The third baby, Paul, is about fifteen months old.

My two next older are four years old, and are now attending the kindergarten. Just now I have thirteen little ones in the kindergarten. In the lower primary school there are twenty-two. The high school has thirty-two of the boys, and thirteen earn part or all of their own living. Five have been baptized, and one is awaiting the next baptism. There is a greater degree of truthfulness than formerly.

The invalid whom I have reported before is now free from suffering. About the time he died we lost two others. One was never a strong child after coming to us. At Christmas time he had whooping cough. Then in March he had measles, followed by pneumonia, and he could not stand it. The other, while he had both whooping cough and measles, did not have pneumonia. But, knowing something of his ancestry, I feel that God took him while a child to Himself. He was a dear boy. There were three days of extreme suffering. Then, when it seemed as though we could not stand it longer, one of the preachers, who was helping me care for him, prayed that the dear Father would relieve the suffering or else take the child home. He kept stiller, though he had seemingly been unconscious to all. A few moments more, and his suffering was over. With heart and voice we thanked Him who answers prayer. That night we laid the little body in its last resting place.

One little boy twice ran away to Bhadrak, forty-four miles. He walked all the way each time. But the second time his reception was so cold that now he stays here contentedly. A beggar child from Midnapore ran away, and was brought back by another boy who found him, only to run away again after he got well fed up.

The difference between this and other years may be accounted for by Hally's comet.

Thanks are due to many for helping during the year. I may mention specially donations of clothing from Raja Baikuntha Nath De, Bahadur, and his nephew, Babu Monomatha Nath De.

Boys' Intermediate C. E.—This society has had regular meetings, and the interest has been good. There are two boys who trouble us by their lack of interest, but several others have been baptized this year. Nearly all take part in the meetings, and they pay all their regular dues. They have recently paid the yearly membership dues to the local union for another society which is too poor to pay. During the past year I have had the help of one of the preachers, Probodh Chundra Nayak, in looking after this society. It is my hope that these boys will become more truly Christian men than any of our former boys have.

Bible-women's Work.—The report of this will of necessity be incomplete this year, as it has been in my care but three months, though Miss Dawson kindly let some of them go with me during our cold season touring. November 26 Sukha and Monie went with me for a few day's work at Soro. Shortly after our return Monie went to Ujurda, where she worked nearly the entire cold season. December 6 Ratnie and Jabuna went to Bhadrak. Ratnie used to work there with Miss Barnes, and Jabuna is the mother of the preacher there. They remained till the last of February. Mariam and Lucy were out more or less with Miss Dawson. Sundari was the only one who did not go from home. She had whooping cough and measles, and for a long time could not work.

The work around Balasore is quite interesting. At present one afternoon a week they visit the hospital and talk with the patients, and find some cases that are interesting from another than a medical or surgical point of view. Nearly all are ready to listen. fff

I may note that the cold season work covered almost the entire length of the main road through Balasore district, but not far to either side of it.

Among the Villages.—I could perhaps better report the work of others than my own. In December I spent a week in Ujurda while Ganga, Probodh,

Rachel and Monie spent about two there at that time. Rachel is one of the Metrapore Bible-women. In January a few of my boys, with Probodh, Upendra, head master of the girls' school, and James, head master of the boys' lower primary school, and myself, spent nearly a week there. In May again several of the boys, one preacher and I were there for some days. Each time they worked in the villages and markets. Once they had an entertainment for the Christian people also.

We had a week's work at Metrapore, also. There were two preachers and a colporter. I went with the two Bible-women who live there. There is one noticeable feature of their work. The Hindu women take great interest in having Christian books read to them. Ruth often reads a Christian book to them a few pages a day. She cannot finish it all at once, for she goes to several homes, and they must not be out late, for fear of a tiger jumping out of the jungle at them. The women say, "Come again soon and read more to us. Mark the place, and we will hear more. Come soon."

Since these two, Ruth and Rachel, have been at work, the interest among the Hindu women in Christian teaching has greatly increased. Their work does not receive the attention and encouragement it should. Their are nine miles away. But during the week that I spent with them, I was pleased with what they did.

Bhadrak has often received visits. Some of the boys spent a week there in May. They are not very steady in outside work, but still they sold some books. Here in Balasore they sometimes go out to hold a Sunday School in some village, and nearly every Sunday they distribute tracts at the trains.

E. J. HAMLEN.

REPORT OF MRS. AGER.

Sinclair Orphanage.—On reading over my report last year, it seems to me that my work was the same up to about February, 1910, when an epidemic of pneumonia, following measles and whooping cough, took hold of many of the girls. I called in the doctor from the hospital, and also telegraphed to Dr. Mary Bacheler, who very kindly came at once, and took entire charge of the sick ones. Several died of this disease, one of consumption and some of heart failure. My own little adopted girl lay at death's door with pneumonia for some time; but her good constitution, and above all, God's blessing, brought her through. The Hindu village at the back of the orphanage grounds, and others nearby, also suffered from this epidemic.

The girls joined the training school in January. One girl married and went to Metrapore to make her home there, and I hear she is happy. Several girls were baptized; I cannot tell the number, as the record book is with Miss Barnes at Balasore.

At our Committee meeting in March I asked to be relieved of the orphanage and school work, as I was very run down in health, and nervous to a degree. The strain had been as much as I could carry. I was transferred to Midnapore, to take up the Hindu schools of which Dr. Mary Bacheler had charge, as she was going to Balasore to relieve Miss Dawson (now Mrs. Grimes) of the widows' home and zenana work; while Miss Barnes became superintendent of the girls' orphanage, and Miss Coe took charge of the girls' school.

It will be a great comfort to the superintendent of the orphanage to have a doctor near, one who can come at a moment's notice, day or night, and not to have to send a couple of miles for medical help.

It was decided to take the girls to Jellasore for a time, while the whole premises underwent sanitary and other repairs. So on the morning

of April 9th we boarded the train at Balasore, bag and baggage, for Jellasore, and there I dropped my care of the children, and it also seemed as if I dropped a part of myself.

Girls' School.—This went on about the same as usual. A candidate was sent up for the middle vernacular and another for the upper primary examination. The girl for the former examination failed to pass, but has entered the training school. Another girl who passed her class examination also joined that school. We now have three girls from the orphanage in training, and hope for three good teachers in due time.

S. M. AGER.

REPORT OF M. W. BACHELER, M. D.

The Widow's Home.—When the Widow's Home came into my hands the first of last June, there were seventeen inmates, ten women and seven children. Since then one has died, a fine little boy has come to us, a younger widow was transferred to the orphanage, three have gone out to work, and another is soon to go. One has been taken in, and, soon found a place for her, which, unfortunately, she kept only a short time, returning to Kharagpur, from whence she had been sent here. At present there are in the Home five women and five children.

Four of the inmates have supported themselves, and a fifth has done so in part.

A short time before Miss Dawson left, three of the women were baptized, and more recently two others.

The Zenana Work.—This department came into my hands last June when Miss Dawson left our mission. No changes have been made since then. Thirteen teachers teach in twenty-seven sets of houses, visiting each set alternate days; one teacher has an extra seat near her home.

There are about 185 women and girls under instruction. As they finished their primers, Miss Dawson gave many of the pupils for their reading books, "The Way of Salvation," "Gupta Puran" (the Gospel story in verse, "Life of Chundra Lila," a Gospel, or some other distinctly Christian book. About twenty-five or thirty pupils are now reading in these books.

M. W. BACHELER.

REPORT OF MISS COE.

"Life is sweet, hother there's day and night, hother—both sweet things; sun, moon, and stars, all sweet things; there is also a wind on the heath."

The above is my verse for today on my calendar. It's true in Indian and could be emphasized and amplified a hundredfold, and still be true. The day and night have been full of sweet things to me this year—of the beauty of new seasons; new trees and flowers; and above all these, the beginning of an acquaintance with a new people and new friends.

There is one thing that has been sweetest of all, and that is hearing of the love of Jesus in a strange new language, told to a people whose faces show that they do not know of Him. Really to see the curious crowd gathered about the old well in the Balasore bazaar, and to hear ringing down the street the words, "Jesus Christ saves from all sin"—how it carries one back to the days when Paul preached in the market places of Asia Minor, and still further to the days when the crowds thronged about the Lord.

My work thus far surely needs no explanation or report. I have been trying to learn Oriya a process which by his own confession exacts much patience from my pundit, but which is of never failing interest to me. It seems to me that my progress in speaking has been extremely slow; but friends encourage, and I always keep hoping to do better the next day.

I find much to occupy my time among the Orphanage girls. I'm afraid it is mostly play, for my moral fibre is weak when a whole procession of little folks invade my room.

My one responsibility is the girls' school on the compound. It has been in my charge since the first of April, and I find it a most interesting place to visit. It has taken me some time to discover the fact, but it really is very like a school at home, corresponding to our first six grades. I have found the four teachers genuinely interested in their work, and very open to suggestion. The two women teachers are former Sinclair Orphanage girls. Fortunately for me, they all understand English.

I can't tell you that my children's minds are thirsting for information. In fact, the way of learning here seems to be extremely thorny, and is trodden with many tears. It is my highest ambition at present to make the path a little pleasanter. If I succeed, I shall have something to write about next year.

A. B. COE.

REPORT OF MISS GOWEN.

Has the time really come when I am to give a report of the kindergarten? Like many other events which are a long time culminating, when the moment finally came for me to enter its doors as superintendent I could truly say "This is so sudden." Miss Bomwetsch's unexpected departure in June left me no alternative. The junior teacher's examination was due in six weeks, when eight girls would take the government examination in written work and practice teaching. After two weeks Miss Das, who had been Miss Bomwetsch's assistant, returned to take the training class work until after the examination. Having had almost the entire work of the training class, and being rather a frail girl, she had become quite tried and ill, but her interest in the success of her girls was sufficient to bring her back at a time when we cannot even fancy what we would have done without her.

With Miss Das' return it was necessary for some one to live with her, so I left my first home, Sinclair Orphanage, to live in the old mission house. For several weeks I had my lodging in that house, my meals with Mrs. Hamlen, my possessions in Snclair Orphanage, four hours every day in the kindergarten, two hours with a pundit, and the rest of the time coming and going. Fortunately Miss Coe's parents gave me a bicycle my last birthday, otherwise I don't quite know how I could have made connections.

Finally the junion examination was over and five of the eight girls in the class passed and received government certificates, some of them doing themselves and the school credit, especially in their practice teaching. Then Miss Ellen Chundra, B. A., a Bengali lady, came to take charge of the new training class, which already numbers twenty-five, and with this my story of the training class ends, except for this statement, that I believe every one who has an interest in the kindergarten work may heartily thank God for Miss Chundra's presence with us.

The training class which was formerly in the kindergarten hall had to be removed to another house and the spacious, pleasant kindergarten hall seems almost ready to burst when our 130 little brownies with twelve teachers settle themselves in their respective places and begin their day's work. We call it kindergarten. I sometimes fancy the shades of Froebel beseeching us to give it a proper name. Primary school would suit very well, but a kindergarten *it is not.* Yet, "What's in a name?" Let's go on calling it kindergarten. There are few sweeter words. And some day, God willing, a portion of it shall be worthy of its name.

I have two pupils studying English, one a Eurasian girl whose father is stationmaster at Bhudrak, and a little five-year-old lad whose father is one of the deputy magistrates in Balasore. There are twenty-five Hindu

children on our roll. Nearly all our Bengali boys and girls, the children of government officials. Our Sunday school has increased during the past few months. We have an average attendance of sixty-five children. Some of our day school children attend the larger S. S. in the high school building. Probably one hundred of our school children are in the S. S.

Did I tell you people at home once that I didn't want to do kindergarten work? That was before I had seen this place, for as I think tonight of the work throughout our field—the world—it seems to me there is none I could love better.

Send your purses and prayers;
Come yourselves with good cheer.
If the Master is calling,
There's nothing to fear.
Your cup will be brimming
With joy every day,
And the love of these precious brown babies.

SADIE B. GOWEN.

REPORT OF MISS BARNES.

On April 9th Sinclair Orphanage came once more into my care. Repairs had to be made on their house and school-house, a long "pucca" (cement) drain made, etc., and the girls needed a change to benefit their health. After much consideration where would be the best place Jellasore was decided upon. It proved to be no mistake. We were then two months in the mango season, and such a feast of this deilcious fruit as those blessed old trees gave us will long be remembered! E'en tho' the coming year they should bear none, we'll look on them with loving eyes for what they have done this year. And I never before so much appreciated the Subornarekha (the line of gold) river near by, until our troop of over sixty girls went down daily to bathe, and once a week to wash their clohtes. What good times they had and how good for them! There are now 65 girls in Sinclair Orphanage, including one girl, Kenari, at present in Calcutta, at school. We have great reason to give thanks to God that there has been so little serious illness and no deaths since March, and several who were constitutionally weak are much improved. It is a great help and comfort to have Dr. Mary Bacheler with us in illness, and also Miss Coe. Both are exceedingly kind, and loving and helpful always. Two girls were baptized in June, and several more are asking for baptism. The pastor of the church, Rev. Natabar Sing, comes on Friday evenings for a meeting with them. This is much appreciated. On Sunday evenings, Dr. Mary Bacheler has been teaching them to sing new hymns. They learn quickly and can sing sweetly. There are quite a number still unsupported and if any who read this would like to help, we shall be glad. We are so thankful for the "Mother Hubbard" frocks. About 30 wearing them go to kindergarten every day. I am hoping more frocks will come.

Thanking the friends who pray for Jellasore and Sinclair Orphanage, and wishing you increasing joy in His blessed service, I am, your fellow worker,

E. E. BARNES.

BHADRAK.

REV. G. H. HAMLEN in charge.

RAJANIE MAHAPATRA, Evangelist.

Three School Teachers. One Colporter.

Mrs. Hamlen and I have visited this station several times during the year. There has not been much change in the work from last year. We did not secure the third teacher for the school till the end of March, when one of our Balasore colporters, whose wife can teach, was sent there.

It is such a pity that a missionary cannot be located at this place. Yet this is only one of the needs that wring our hearts. The only thing we here can do to meet it is to pray. I do hope that no one who may read this stands in the way of the answer to those prayers.

REPORT OF CHARLES SINHA.

It was with a very heavy heart that we received the news that our much beloved and respected missionaries, Dr. and Mrs. Coldren, were going to leave us for America in February last. I was very ill at the time of their departure. Even the doctors had no hope of my recovery. But I am very thankful to our dear Lord Jesus that He saved me almost from death. My prayer is that He may give His divine strength to do the work he bestowed on me faithfully.

Church.—Our church is fortunate enough in getting one of the most experienced preachers, Rev. Joseph Fullonton, as pastor. He does not hold services every Sabbath day, but makes arrangements for other preachers to conduct them in turn. He does not take the pastor's salary, but deposits the same in the Postoffice Savings Bank for building a chapel here, as the want of a chapel is very keenly felt. The covenant and communion meetings are well attended, and the prayer meetings are held in the houses of brethren regularly. Two have been baptised and admitted into the church this year. The total contribution was Rs. 163-12-0, out of which Rs. 79-12-0 was paid by our countrymen.

Evangelistic Work.—This work was carried on very well by brothers Joseph Fullonton, Padmalochlan Das, and Apana Munjet, and sometimes by Delraj Singh. Previously we used to sing a hymn to gather the people, but the big International S. S. pictures, posted on cloth, are used now, and the people are taking more interest to see the pictures and to hear the gospel. In the last cold season they went up to Tehiri, on the north, and up to Ghantoswae on the east, and up to Kainpara on the west. They did not go to the south, in the Cuttack district. As there was no colporter here, the preachers took upon themselves to sell books in addition to their own duties. They sold Rs. 25 worth of books last cold season. I accompanied them up to Matto, and had a pleasant work at the market. Many people were anxiously listening to the gospel, when a Brahmin priest came and dispersed the crowd.

There is a Hindoo temple named Akhandelmani five miles from here. Every year, after harvest, a great festival is held there. Thousands of young men and women gather there at night to see the Mahadipa (a big light) lighted on the top of the temple. Our brethren had to stay there for three or four days. Nearly seven rupees worth of books were sold there last time.

Most of the illiterate Hindoos think that God makes them do everything, virtue and vice, so they care very little regarding their work, right or wrong. May the Lord bless them so that they may learn to know the true God and how to serve Him.

Every evening the Babus (educated Hindus and Mohammedan gentlemen of the town) gather in a place. Sometimes we have talks about Christianity with them. Thank God that they appreciate it, and the Christians are respected here. When our beloved missionaries, Dr. and Mrs. Coldren, were here, they used to visit the sick and help them with some medicine, especially from the out stations may come to us for such help when they were away at Kharagpur last year. Some of them had to write to them for the same. We intend to ask the Indian committee if they can see their way to provide us with some medicine, such as quinine, camphor, castor oil, etc., for the treatment of general diseases, such as fever, cholrea, etc. We think it is our duty to see the sick and help them not only with medicine for their sick bodies but to bring them to our Lord Jesus for their sick souls.

Zenana Work.—Ajodya Fullonton, wife of Rev. J. Fullonton, goes to the adjacent villages to talk with the village women regarding the Lord Jesus. She is partly paid by Mrs. Mayston, wife of the port officer here, who takes much interest in the work. We are sorry that Ludia Hudson is sickly and unable to work well. Her case will be considered in the annual meeting. Ellie Singh was working in Chasakhand, but she has been transferred to Jellasore with her husband.

In the last examination of the woman's Bible study two passed, and one of them got a prize.

Middle English School.—Considerable change has been made during the year under review, regarding the financial position of this school. The Jajah of Kanika, who used to give a monthly grant of Rs. 25/—, almost from the beginning of the school, expressed his unwillingness to help the school any more, as he had to run a M. E. school at his own place. So the school was going to be abolished, after showing good results for 25 years. But our worthy secretary, Mrs. Mayston, as well as Mr. Mayston, who took much pains and called a meeting of local gentlemen and explained the necessity of a M. E. school so well that many promised to help the school by paying a monthly subscription toward it. Then Mr. Godfey, the sub-divisional officer of Bhadrak, while on his tour, visited the schoo l,and tried to raise some subscription from the head men of the adjacent villages, but our kind missionary, Dr. Coldren, having a long experience regarding the management of a school, thought it was hard to run on school depending upon this kind of charity only, so he made such a good arrangement that we are in a position now to manage the school well. The Rajah also was good enough to subscribe ten rupees per month. We are very thankful to those that take interest in the welfare of the school. The attendance is good, Sankarnath Das, one of our best village teachers, and Kasiwath Mahanty, of Barchimpur, are bringing their children to the school. The house at the roadside is being used as lodging for the outside boys. Eight children are living in two rooms.

Village Schools.—Padmalochan Das and sometimes Rev. Joseph Fullonton visit them and examine the boys in the catechism and S. S. lessons. The books of S. S. lessons, newly compiled by the Orissa S. S. Auxiliary Union, are very useful, and are better than the leaflets previously used. The illustrations help the children. The boys now come to the S. S. somewhat prepared. The Hindu teachers also can understand the lessons and are able to explain them to their students. The village schools are the center of our work. Generally the villagers gather at the school house during the time of our preacher's visit, so he finds opportunity to preach there. In the all India S. S. examination last year 44 passed, and 2 of our boys gained silver medals.

Girl's School.—The teacher, Nirada Das, is attending the training school at Balasore. Aujanabati Hudson is working in her place temoprarily. We have tried our best to increase the attendance and the roll number is 25 now and the work is going on well.

Chasakhand.—Brother Debaraj Singh has been transferred to Jellasore, so there is no preacher there now. Other preachers have to go every Sabbath to hold services and Sunday school there. Nearly all that belong to the Christian commuuity attend the service. Kamadeb Das has been dismissed for his bad conduct toward his own brother. We are very sorry for him as he was the first convert in Chasakhand and was a good worker for some time. Mati Das is learning the Bible, and we hope he will be a Christian soon. He is living an honest life. We think the mission committee will soon arrange to send one of the preachers and Bible women to live and work there.

Kandgaria.—Appana Munjet removed there in July last, and the work is going on well. The people of the village like him very much. Nisha Samal, one of our converts, is also living there and cultivating some land. Satenghna is still on the mission land, but we have heard of no row yet and are glad that they are on good terms. There were some who wanted baptism but we thought we should know them better before baptism. The people are watching the Christians to see if they are true to their word.

OTHER WORKERS.

Two Bible Women. Eight Teachers.

REPORT OF MISS BARNES.

The year has passed quickly and again it is time for the annual report. I am glad it has been my privilege to do what little I could in Jellasore. The Bible work and Zenana teaching has gone on all the year and we were out in country evangelistic work most of January and February. Miss Dawson, the Bible-women and I were together in January, and as usual greatly enjoyed the work. In February my women and I went south from Balasore and on to the quarterly meeting in Chandbali, the last days of February. We had encouraging work, and sold books in villages and markets and gave tracts to those we passed—one advantage of the slow moving bullock carts. In June an old Christian man who had been teaching Christianity came with two men from a village we visited in January where Miss Dawson had given her magic lantern pictures and told the story of the life of Christ and said they wanted to talk about religion. They stayed over Sunday, went to church, and afterwards saw a number baptized. Like some others, I believe they know and understand the way, but the great barrier in their minds is the breaking of caste. The day schools in my care have gone on as usual. There are two outside Hindu girls' schools and the middle vernacular school at the Mission house. There has been some change of teachers, but I am glad to say we still have the same faithful head, Pundit, and the Christian teachers, Umesh and Gori. There are two Christian teachers in the outside school. Many women workers did well in the Bible examnation last October. Eleven took the examination. One received full marks. Eight others over ninety per cent, one over eighty per cent and the other passed. Six from our little Christian community have been called home this year. Five members of our church, one a deacon, and the last, a few days ago, my dear Bible woman, Gurubari. While she was thanking and praising God, her spirit left the body of pain for the mansions prepared. A brave, true, faithful soul! How we miss such! She had sold many Gospels and told many of Jesus as well as she could. Her prayers will long be remembered by those who were privileged to hear her talk to God, and know of the answers that came..

. Altho' the church is small there are reasons for encouragement. There is now a settled pastor, Debraj Sing, a good man, and the contributions of church members have been more than last year. They now have the Lord's supper regularly the first Sunday of every month. Most of the people do not like to come out to evening prayer meeting. But the pastor has lately got a good American lantern, and goes from house to house for the meeting. The Sunday school still has our good Umesh Curtis for superintendent and each year a number take the all India S. S. examination, of different grades, and pass. A part of the year Hindu Sunday schools are held in villages nearby and all the year, once a month, they come to ours at the Mission house and get picture cards.

The Christian Endeavor Society goes on regularly. The meetings are held Sunday afternoon. One member (the missionary) went to the World's C. E. Convention in Agra last November. Recently, after months of suffering from rheumatism, our first member to be called home was Moti Lall Misra. Since I have been in Balasore I endeavor to be in Jellasore over one Sunday in the month to pay the workers. I often stay several days, visit the schools, etc., and attend the church to which I belong. I like to be there, and they are glad to have me. They prayed so long for a resident missionary, and some of the little band lovingly call me their "dear shepherdess" and want to know when I am coming back to stay. God bless them!

E. E. BARNES.

METRAPORE.

REV. GEO. H. HAMLEN in charge.

Two Teachers. Two Bible Women.

I am sorry that I cannot report fine progress in this little church. But somehow the prince of evil seems to have a good deal invested in some of the people of the place, and he does not forego any interest. It is not worth while to soil the pages of this report with the story of the latest trouble there. I do not despair at all, but expect that by the time for the next report, there will be much better things to say about the place.

The Bible-women have done considerable work in the villages around the place, and the women in the houses—homes only by euphemism—give them a hearty welcome.

The most encouraging thing in this section is the eagerness of some of the people in a village two miles away to have a school. The name of the village is Swapna (Dream). It is quite a large place, and there are several other villages near it. A school has been begun, and some seventy or more children enrolled. There are many more who might come. There is no school within two miles. The people are willing to put up a house, and to pay small fees, and want us to help them. They are willing to let us teach the Bible, and want us to take charge of the school. I hope that this may be an opening to some good for the swarms of children in these villages.

Two Bible-women. One Colporter. Twenty-six Teachers.

REPORT OF REV. C. A. COLLETT.

This has been one of the happiest, one of the saddest, the most encouraging and most discouraging years I have had in India. It has been the happiest because I have been extremely busy, and the time has gone quickly. It has been the saddest because I have been brought too much in contact with the financial side of Indian Christians. It has been the most encouraging because by this year's work I see a hope for the advancement of the Kingdom by Indian agencies. And it has been the most discouraging, because I have not felt that my duty lies in Santipore, and because people have such a meagre conception of the spiritual value of Christianity.

Self Support.—The work is moving. The people are learning the meaning of self support. The church has become independent of mission aid. They say if the yoke had been put on them sooner, they would have learned its value sooner and could now bear it much easier. They have never raised so much money in one year, and I may say in several years, Rs. 835-2-9. All disturbances have been settled in the village (panchayat) court, only one got into the government courts, and I stopped that by sending the village court's decision to the magistrate of the district. And yet with all that can be said, if you will read the report of former missionaries, you will get a fair idea of the Santipore of today. One thing, however, makes a change in conditions. Since the land has all been sold, there is less incentive to become Christian. The great majority of those who come now say they will become Christians if I will help them withstand the unjust measures of the land-holders.

New Church.—Perhaps one of the most encouraging features is the erection of the new church building. Most of the people are really interested in it, financially interested. The young men have dug trenches, lifted stone, helped to raise steel beams, and done various other work. Several times they went to the old fort and excavated stone; they built the brick kiln; and most of them have already given their one month's salary and are beginning on the second. The walls of the building are completed, and the roof is now being put on. I hope to complete the work by Christmas. The building is 55 ft. by 33 ft. with an L 17 ft. by 33 ft. and a tower 12 ft. by 12 ft., outside dimensions. The tower will have a pastor's study on the second floor.

Sunday Schools.—There has been a little falling off in the Sunday schools, because of a new regime. I made the rule that no Hindu school would receive aid which did not report in Santipore at least one Sunday in each month. The result was that two schools were dropped from the list. One teacher fell into disgrace, so I had to excommunicate him. But I am more pleased with the results of this year's work, because at least one-twelfth of the work has been done under my own supervision and the pupils have been drawn out of their village dens to see how Christian people live.

I find it quite difficult to overcome the old idea the people have that for whatever they do they must receive pay. If they go to school they must have a cloth or a monthly stipend. The idea of self improvement for their own future good does not seem to enter their minds. It is all to please the missionary, build up his schools, and if it pleases him, and he gets a name for it, why should he not pay for it? However I have determined to "fight it out on this line" if it takes a hundred summers. So where you see a shortage, you can say Collett has shut off someone's pay.

Industrial.—My industrial work continues to be a source of pleasure, although no little anxiety. This year I received a grant from the District Board, and an equal sum from Government scholarships, which enabled me to send two young men to the Government weaving school in Serampore, where they have learned the later methods of preparing thread, coloring and weaving. I now hope to be able to improve the school a great deal. Two of last year's students have become teachers, taking the place of Hindus.

The Balasore Boys' Orphanage has become the chief patron of the school and relieves me of a large amount of cloth. Santipore being a jungle station, it would be very difficult to dispose of the work of the school if the orphanages did not thus aid us. The girls' orphanage has also begun to try our work, and I hope we shall be able to "make good." The boys say my "Gali" is making them good weavers. I can still make use of a little temper when things don't please me, so perhaps you can guess what "Gali" means.

Country Work.—The cold season work has always been the greatest pleasure of my service in India. As soon as the first cool breeze blows from the north in October, I become restless and begin to examine my tents about twice a week. A few weeks ago Mrs. Collett received a letter in which the writer asked if Mr. Collett was able to go out in cold season work this year. When he doesn't go, you may know that the Indian Committee has robbed him of his independence, and stolen his tents. I thoroughly believe in tuoring the country with magic lantern, bands of singers, bands of preachers, brass bands, wooden bands, bands of drums and violins and cymbals, any and every kind of a band that will stir the people from their lethargy, and let them know that King Immanuel is establishing his reign in India. For this cause I came to India, and for this cause I remain here.

There is one great disadvantage in doing country work around Santipore. There are no roads, and we have to wait until the rice is cut so we can go across fields and through jungles from village to village. There is the one road to Jellasore.

This year we took a twenty-five mile trip before Christmas and learned something of the magnitude of the work to be done in this section. The magic lantern supplied me by Mr. Thomson proved most effectual in enabling us to give the connected discourses on the life of Christ to large crowds of people. I remember of one questioning the school children of a village concerning what they had heard and seen the night previous, and they showed that they had been all eyes and ears and were able to give the substance of the evening's discourse. Only two years ago these villages would not touch a christian book; but this time took about 300 books and came, 600 strong, to the lantern lecture four successive nights. This was within five miles of Santipore.

After Christmas we made two trips, one fourteen miles, and the other thirty. Mr. Griffin has told you of the pleausre (?) we have trying to keep the Santipore-Jellasore road in repair. But it must be done, and Government gives us the enormous amount of $100 a year to keep up seven miles of road, about one-half of which is flooded by the river every year. Taking my tents, shovels, picks, hoes, coolies, gravel, preachers, colporters, books, magic lantern and an endless amount of energy, I determined to show the people

two roads at one time, one to Santipore and the other to righteousness. The preachers, colporters and I worked mornings and afternoons in the villages, and gave the lectures every night, the road work continuing in the meantime. The road to Santipore has remained firm and the people are praising the Sahib for it. They also speak highly of the Sahib's religious fervor, but they are not making as free use of his spiritual path as they are of the gravel one. However these efforts are not thrown away. Quite often people come for medicines, books, and even to attend school, because of meeting us on these trips; and thus the little leaven is being scattered. May it soon leaven the whole lump.

C. A. COLLETT.

REPORT OF DORA J. COLLETT.

The Santal School.—I saw, during the rains last year, that several children attended as long as the parched rice was given, so that they need not go to their homes in the rain; then they stayed away as soon as the rice was stopped. We have not given the rice this year, with the result that the school is much smaller at present. It is hard to persuade the people that their children need to learn to read. They must herd goats and cattle, and care for the baby, while all who are old enough go out to work. However, many children will come in after harvest.

The *Night School* was closed for a time, but has been opened again with the boy who passed from the M. V. school as teacher, and one of the older but less capable outside teachers as assistant. I have two classes in English this year, and Maguni, Mr. Collett's assistant, has two also, the lower classes.

Several new girls have entered the *Sewing Class*. The older girls have learned to cut jackets, and some of them can make almost as nice buttonholes as I can. I promised each girl a jacket as soon as she could cut and make it, and this has been an incentive to learn to do the work well.

I have been pleased with attendance at the *Kindergarten S. S.*, though it is small at present, because many of the children are kept away to watch the rice fields.

The *Zenana work* has changed much during the year. Miss Baunerjee, the assistant inspectress, was here in January, and she recommended dropping all pupils who could read and write well, and insisted on dropping all boys and the girls who were not married or engaged. Of course, the teachers had to hunt new pupils and go to more distant villages. This has necessitated stopping the morning's work, and sending them out for a long afternoon. One teacher moved away, and I have taken on another. She was in the senior training class and is doing excellent work, and I have often wished that all of my workers were as bright and energetic.

I was unable to go out with the Bible-women during the cold season because Mr. Collett chose a jungle route.

All of the women passed the Bible examination.

After moving to Santipore, it became evident that Ivan must be sent to school, so I took the children to Darjeeling, and ke tphouse three months, putting Ivan and Cyril into day school. Mr. Collett was with us one month, regaining all he had lost from hard work in the heat, with no home makers, and much more besides. It made our hearts ache to leave Ivan, though we had planned on it so long. He was delighted, and has kept well and happy. Cyril and Allan lost their roses long ago. but are not peevish and cross as they were last year. This has been a great relief to me, and given me much more time for other work.

DORA J. COLLETT.

UJURDA.

SIRISH CHUNDRA FULLONTON, Evangelist and Pastor.

Four Colporters. Three Teachers.

This outstation with its work was taken over by the Home Mission Society about the beginning of this year. The amount formerly expended by the mission for the work is now turned over to the Society, and the officers of the society have full charge of the work. The evangelist located there reports as follows (translated).

"The work of the Lord here is carried on by one native preacher, four colporters, and a zenana teacher.

There are now 131 in the Christian community, of whom 76 are members of the church. Religious services are held regularly among us.

The colporters sell about a rupee's worth of books monthly, and in the intervals they help the preacher. The Lord's work in the villages and markets is going on well. The zenana teacher goes to the villages and teaches the Hindu women as she has opportunity.

The internal condition of our church is not so good as it might be. I hope that in the future the members will be more truly the Lord's people. This is my constant prayer. Please remember this church in your prayers."

Rev. Natobar Singh, a member of the committee which looks after the work in Ujurda, furnishes the following:

"The condition of the people of the Ujurda church is very bad in worldly matters. Most of the time they depend on green things. Sometimes their children spend the whole day without a thing to eat, and more frequently they have only half enough to fill themselves up. The reason of this is that their cultivated land is small in area, and their crops often fail, even on what they have, so that they have greater distress.

Another sad thing is that nearly every year they borrow rice and money from the neighboring Hindus to keep themselves alive, and because they cannot repay the loans, the amount keeps increasing constantly. In such distress as this they manage to exist.

Near their village is a piece of land worth about three hundred rupees (one hundred dollars). If this land were taken up, and they were allowed to use it, it would be a great help to them.

School.—Ujurda has a lower primary school. There is a Hindu master, and two Christian women teachers. Most of the children are Christian. At present one girl is preparing to take the scholarship examination. The school has a grant-in-aid from the District Board as well as from the Mission. In order to teach the children in this place, a little expense is necessary in the way of help to them. It is hoped that on account of their school privileges, these children will be able to help others in the future.

The native people have taken the charge of this church this year. They are trying to help it as much as possible. In addition to them, Mrs. Hamlen comes to the place every year, and going among the villagers, and among the Hindus round about, helps a great deal. With her some of the Bible-women come, and going to the Hindu women in their homes make known the word of the Lord. One Bible-woman especially remained here about three months, and helped a great deal. We hope that this sister will again come and stay, and help the people in the village and all around it.

Dear readers, please remember this church in prayer, that all the people here may come to see the glory of the Lord."

I may add that this church has increased in numbers quite rapidly during the last two years. And it is indeed a light in a dark place. There is one reason for the poverty of the people which our brother has not given. Before

they became Christians, they lived by thieving. Now that they have given that up, there is gerat difficulty in their earning an honest livelihood. That they suffer great hardship, as he shows, and do not go back to their old depredations on their neighbors, is surely proof of some change in their lives. I do hope some way may be found to enable them to live a little further from starvation. The plan our brother proposes will help, and I hope to see it put into effect soon.

REPORT OF A. L. KENNAN.

I had an extremely disagreeable time coming back to India. Old Neptune insisted upon my doing reverence early and often. He acted a very tyrant all the way. We found some compensation, however, on our arrival, in the warm welcome that awaited us both on the part of the missionaries and the native people. After about a month recuperating from the sea voyage and an indiscretion of my own, I came back to Bhimpore, and the work swallowed me.

Building.—The proposed hospital was one of the first things demanding attention. Everything for this must be prepared "from the stump." This, moreover, is the land of day after tomorrow, and things merely creep. I first had to secure permission to dig stone. I siezed a favorable opportunity and secured the permission from the Lalgarh Raja. His manager, however, wanted to be bribed a little before he would sign the necessary papers. I had some difficulty in avoiding this, but eventually did. The lime that I must use was scattered over a certain kind of clay soil in little lumps, the larger of which were the size of a hen's egg. Permission was obtained from the Ramgarh Raja after the usual delay, and other attempts to get a rake-off on the part of his people. Women and children then gathered the lime nodules in heaps, and carts hauled it here. A lime kiln was built and wood prepared and the lime burned. Wood for the door and window casing and all other uses was still in the log. Some of these were hewn out and some were sawed with what amounts to an old fashioned pit saw worked by man power. These various lines of work are still going on in

one form or another. The foundation is in and the walls up to the floor level. I now hope to get into the new hospital about the first of the new year.

With the water supply I am rather farther along. After looking the ground over carefully, I determined to deepen a well we had that was so located that it was not likely to be contaminated. We began to deepen and struck quicksand at once. The men did not know how to handle it and we had a long, hard time overcoming the various difficulties as they arose. I improvised a sort of cassion out of galvanised iron with hoops of iron inside and we put a wall outside of this on top of the quicksand. The wall as fast as builded went down into the quicksand. One cassion went down with it. It finally struck bottom somewhere, however, and the wall was raised for some feet. A rain came on about this time, and I have not been able to get the water out since to see how matters are. I hope when the water lessens next dry season to find the wall in place, and will carry it from that as a foundation clear up to the top of the ground.

The wind mill tower was also a proposition. No one on the job except myself knew which way a nut turned on a bolt. The forty-foot tower and wind mill were all ready to be bolted together and raised. The directions were very simple. I could easily understand them. But to do as directed without blocks or tackle, or intelligent assistance, was the hard part. I put the tower and wheel together on the ground and then took it apart and raised it piece by piece. The pump and piping were gotten together and put in place. A small tank was put on the roof of the bungalow to be used, pending the erection of the larger tank. Water is piped to the dispensary, the new hospital, the two orphanages and the bungalow. The big storage tank is moving toward completion in the usual day after tomorrow fashion.

Dispensary.—The medical work in the Providence Dispensary has been carried on as usual. More difficult cases are presenting than formerly. The fine assortment of new instruments have more and more come into use, and will be still more valuable when the new Sterling Memorial Hospital comes fully into being. In order to provide more nearly for the dispensary expense it was decided to raise the nominal fee from one to two annas. This has resulted in a considerable lessening in attendance, but there are still more patients than can be well looked after. I wish here was some feasible plan of favoring the poorest patients, and still insisting on those paying who are able.

Evangelists.—The preachers had made one cold season trip before I took over the charge. They went again, this time into the western part of the district, and itinerated for five weeks. Since then they have gone back to their homes and their own village work as formerly. I think that we can say that this has steadily grown. I attempted to look the ground over carefully before putting a preacher in a village, and when once there, I aim to keep some one there continuously ever after. We may not gain much, but we want to hold what we do gain. It is always a loss to withdraw from a place after having begun work. One of the preachers, Surjya, had a mental difficulty and it was not thought best to continue him on the staff of preachers.

The Schools.—In anticipation of an increased grant from Government, the schools were increased from forty to fifty-four. Government was disappointed in its anticipated revenues, and hence was compelled to disappoint us. The decrease in revenue was due to a lessened export of opium to China. The opium trade is a government monopoly, and a very large sum of money is derived from it. The less promising of the schools are being closed.

Bhimpore.—The church work here is in the hands of Rev. Deora Marndi. Regular services are kept up and are well attended. We have all been deeply saddened recently by the death of one of our most promising

girls. She was the daughter of Shim Marndi, pundit in the girls' school, and he had taken great care with her education. After she finished the school here she had been sent to Calcutta. While there she contracted fever in a serious form, that eventually caused her death. She was the best educated of any of our Santal girls and gave great promise of usefulness. What He does we know not now, but shall know hereafter.

Goresole.—Work is going on as usual, but nothing special is reported.

Topabon.—Champai and Timothy are here. Several have moved away to a new village so that the church has decreased in membership. It now numbers thirteen. Sunday school and church services are regularly held. Weekly offerings of a handful of rice are regularly made, and an annual offering when the rice ripens. The proceeds of the sale are used for church purposes.

Ch itrapathar.—The condition of this church is a matter of sorrow to us all. Prosperity and power have proved the undoing of a prominent member of the church, and have caused it much trouble. Strenuous efforts have been made, both by the native Christians and by the missionaries, to win him back. The prospects now are very much brighter than they have been for several months.

Ulda.—There are only eleven members of this church. Sunday services and prayer meeting on Thursday evening are kept up. The pastor, Narayan Soren, asks that Ulda may be prayed for that they "with all their hearts may serve God."

Choinesole.—The Christians here have been receiving a good deal of attention from a Mohammedan of the village, who is bent on driving them out. I have been very glad to see the stand some of the native Christians have taken in trying to help these who are being persecuted. They have raised funds to enable them to stand the court costs. Having received help of God (and their brethren), they continue.

Gotdanga.—No news from here of special interest. Paru is located here and is faithfully sowing the seed. He spent a month in cold season work. His work during most of the year is in the neighboring villages and markets.

Kenduasole.—The pastor, Sundor, has a circuit of little Christian villages that he visits and holds services in on successive Sundays. The condition of this field is perhaps as normal and healthful as that of any of the out-stations. There have been five baptisms. One interesting item in the church report is that one of their number is in jail. He is accused of having stuck an arrow into a man who was trying to take his land away from him. Of the merits of the particular case I know nothing, but on general principles I should say he was probably justified in doing something desperate. The Santals of the district probably do not own one-half the land they did thirty years ago. And the merry work of dispossessing them is still going on. I tell them not to shoot, but if I should consult my own feelings, I should probably add "But if you do shoot, put the arrow in far enough so it can easily be *pulled through.*" Until they do something of this sort I am afraid the Government will not interfere. Its policy seems to be to let things take their course until they are absolutely unendurable. ffi

Boys' Orphanage.—The boys have not had their usual health during the past months. We had an epidemic of measles and another of mumps, and both of these seem to have had a tendency to leave the boys ready for malarial fever. All are in school just now, but we are approaching the worst time in the year and shall have to be on guard. There have been no deaths among them. The boys are a happy and contented lot. I can hear a dozen of them now, laughing and singing out at their house. Rueben is learning to play a Santal flute. We can all of us bear witness, if necessary. Five of the boys, all of them good boys, too, will finish the school this year. What they will do after that is one of my problems.

EVANGELISTS.

REV. CHARLES DAS. SREENATH CHUNDRY CHOKDAR HREDOY PATRA.

MEDICAL ASSISTANT—KHIROD SINGHA.

One Zenana Teacher.

REPORT OF MR. HEM NATH SARKAR.

As my fellow laborers in Christ have reported their work separately, it falls my happy lot to write little.

The station work has been moving on quite peacefully, and with a fair degree of reguarity. Contai is a splendid center from which to work in the villages all around.

To our great joy we find the Hindus here have the broadest possible sympathies for the Christians. The Lord has given us a grand opportunity of pressing home the word of salvation. There is much joy and consolation to us to find that the Word of God has wrought marked changes in the lives of some of them. It has been the aim of our life to shake first their faith in idols of stone and wood. There are a few enquirers who have all that we have except they lack "the one thing needful," and we do not forget to pray for them daily.

I have had some blessed talks with the educated Hindu gentlemen at their homes. To help me greatly in my work among them, Mrs. Grimes supplies me with "The Christian Herald," Mrs. Burkholder "The Christian Endeavor," Miss Gaunce "The British Weekly," and Mrs. Murphy "The Record of Christian Work." Those papers I circulate freely among them. and they read them with intense interest.

Preaching has been carried on faithfully and regularly by us all in the three different markets every week. Also in several fairs and surrounding villages, unless prevented by some unavoidable circumstance.

It has been the duty of Brother Charles and Sreenath to visit eighteen Hindu Sunday schools at least once in the month, and examine the boys in the Catechism. The number of pupils on the rolls is about 360. In addition to the general course of study the children are told the Bible stories. The larger pupils are taught the "Shepherd King." Last year 56 selected candidates appeared at the annual examination, and 45 of them passed creditably. Prizes were awarded to those who got high marks at the examination, but gifts were given away to 200 children. I went to as many Sunday schools as I could with the co-workers every month.

I have found pleasure in teaching a Sunday school class of Christian boys. Last year eight pupils appeared in the All-India Sunday school examination and all of them passed with credit. This year seven went up for the examination. but the result is not yet out.

We are glad to note that Bro. Sreenath stood first in the preachers' examination last year.

We have one Junior C. E. The meetings each month are conducted by the children themselves. We workers always stand by them as active members.

We have no paid pastor, but arrangements are made so that we three

preach in turn every Sunday in the church. We find almost always some Hindus in our church service.

During the year twelve Hindu festivals were visited, where thousands of people were assembled and hundreds listened to gospel tidings.

In our cold season work we took a trip in a boat. We counted it a grand privilege to be the first Messengers of the Cross who visited new villages. We sold Rs. 18 worth of gospel portions in the markets, to school children and in the houses visited. We are indeed sorry to say we could not draw a good crowd with the lantern pictures in the evening, as others do, but we hope and pray that ere long the Lord will provide us with a magic lantern.

I had to leave the medical work to some extent to Bro. Khirode, in order to attend to other more important duties, except on Thursday and Sunday—the market days—when people find more opportunity to come to our dispensary for treatment. Each patient receives a ticket in which is printed in concise form the message of salvation. Besides this, religious leaflets are sometimes given away to each patient with a few words of Christ's teachings. More than one hundred times I was called to see patients at their homes, but of course without any remuneration. The total number of patients treated in our dispensary in the year under review was 4,241.

Whatever little we have done, we know the secret of it is your prayer. Pray that God may use me and the other workers for the salvation of the people to whom we are sent.

H. N. SARKAR.

REPORT OF MRS. H. N. SARKAR.

It is a grand privilege, a joy to me, to follow a system of house-to-house visitation, to reach the Hindu ladies at their homes, every Saturday, to tell them of the wonderful love of Jesus for them. Their education and refinement are not less than mine, but alas! their lives have not been made sweeter and purer by the indwelling spirit of Christ, and their ideals of womanhood have not been formed. Oh! how glad I am to say that Bengali hymns create intense interest and enthusiasm among my hearers and lay the foundation of attachment with which I have been welcomed at every home! I leave with them the life of our Chundra Lela and some other religious biography at my disposal, that they may be benefited by the study of those books in their leisure hours.

The women's weekly meeting, generally led by me, has kept its usual interest. Every one takes part in prayer, singing, and Bible reading.

Sometimes Hundu female patients of our dispensary give me an opportunity of delivering to them the grand and sweet message of salvation.

We are doing the best we can, leaving the results with Him for whose blessings we daily pray.

Pray without ceasing for us.

K. SARKAR.

REPORT OF CHARLES DAS.

As an honorary pastor of the church, I administered the Holy Communion every second month to sixteen communicants, called an inquirers' meeting, and baptized two boys of the Christian community, conducted Sunday service and prayer meeting once in the month; as an evangelist I preached in four hundred and fifteen villages five or six miles apart in sixty-four markets, and twelve different fairs; as a teacher I taught the Word of God in one Christian and nine Hindu Sunday schools, and I was out in the country for forty-two days, distributed a thousand tracts, two

hundred Sunday school cards, sold four hundred gospels besides other books.

CHARLES DAS.

REPORT OF SRINATH CHUNDRA CHAKDAR.

To report as briefly as I can of my work, I must say that as an evangelist I conducted Sunday service and prayer meeting in turn once in the month, as we had no regular pastor in our church; went regularly once with my fellow workers to the three different markets and surrounding villages every week; in our winter tour visited many houses and preached in many fairs, sold many Gospels, distributed numerous religious leaflets, and was a blessing to many. As a teacher I visited nine Hindu Sunday schools at least once in every month to teach little boys catechism, and the older ones the "Shepherd King," and to tell the Gospel stories.

Do remember me in your daily prayers.

SRINATH C. CHAKDAR.

REPORT OF KHIROD CHUNDRA SINGHA.

The patients are treated in the Contai Mission dispensary in the morning, according to rule, fro 7 to 10, and in the afternoon after 4 o'clock one hour. The gospel is preached and tracts are distributed to the patients. Each patient under 12 years pays 4 pice and above 12 5 pice for eight days' medicine. With the amount collected from the patients, medicine is brought again for them. Occasionally medicine is given away gratis to one or two very poor patients.

The following figures from the dispensary records from September to 31st August will show the work done.

Male	1,892
Female	612
Children	633
Total	3,137
Return visits	1,104
Grand total	4,241
Income	Rs. 242—8—0

KHIROD C. SINGHA.

REPORT OF MRS. DAS.

I am glad to report that the Zeuana work is moving on well. The women are taught regularly catechism, sewing, knitting, embroidery, etc. I preach and sing of Christ to them whenever any opportunity presents itself. The women idled away their time before, but now I am thankful they make a profitable use of it and feel inclined to hear of our Lord.

MRS. DAS.

REPORT OF J. H. OXRIEDER.

General.—I suppose there is little need of my going back to report our work at Bhimpore, as Dr. Kennan will report the work there. However, it might be well to say just a few words regarding the close of our work there, as Dr. and Mrs. Kennan did not take charge until in January, and our report should go back to October last year.

We were very sorry to have to leave the Bhimpore work for two reasons; first because we enjoyed the work there, and liked the people; second, because we felt that we needed and ought to have at least two years in the native language if we were ever to return to India. But we found that neither of these reasons were good enough to keep us at Bhimpore.

We enjoyed the work very much and had just begun to get used to things and to be able to speak the language some. Of course we were handicapped in many ways, yet tried to do the work as unto the Lord. I presume we made many mistakes. Most of us do at times.

We were there for a part of the cold season work, and the preachers had been out for some time before we left. But as there was such an uncertainty as to when Dr. Kennan would take over charge, the work done was not what we had hoped for.

The close of our work was just at the busiest part of the season. The beginning of the cold season, and the close of the school year. With the school examinations, teachers' convention and examination, Yearly Meeting, checking of accounts, all came in a bunch; yes, and Christmas. The school year closed with 100 students coming in for the exams. A good percentage of these passed. Our teachers' convention and exams. were very good indeed, the teachers doing the best work they had done while I was on the field.

The work on the whole had been fairly satisfactory to us, seeing we were new to the field and language.

The children had kept well in the Orphanages and boarding home.

The Government Inspectors had visited and given good reports of the school work, and the Government Inspector from Hoogley had been asked by the local Inspector to visit our school, which he did, for the first time in years. He said it was the best country school he had ever visited in India. He said we were also doing much more for our teachers than any one else he knew, and that he was willing to help us in any way he could.

There are many features of this work that would make interesting reading. Look for Dr. Kennan's report.

Kharagpur.—We came back here in January. As Dr. and Mrs. Kennan took our charge at Bhimpore, and as Dr. and Mrs. Coldren were still in charge of the English work here and were to remain until Feb. 18th, I decided to go into the country for the cold season work with my three preach-

ers. So we packed our things, took the train south 40 miles and then hired bullock garries, and started for the country. First to a big Raja'h place, where they were having a big *jatra*. Here we stayed several days, and preached and sold gospels. Then we started north, making the smaller markets, and all the villages near them. This meant long tramps over rice field in the heat and dust and walks of from three to twenty miles a day, preaching and talking to men in markets, on street corners, in their homes, by the wayside, in the field, and in any and every place where we could get them to stop to listen or we could sell them gospels or some good religious book, or give them tracts.

This was my first real cold season work, and it brought much joy and also much sorrow to my heart—joy because of so many who were eager to hear and to learn about Christ; of others who seemed to realize the need of salvation and seemed to be at the very door of the kingdom; of others who seemed ready to enter in; and because of hundreds, yes thousands, who crowded around us to hear the gospel.

But there was the other side. Sorrow. Why? Because we were able to reach so few of the thousands whom we saw during this trip, and realized they were only as a mere handful compared with those that we as a mission have promised God we will give the bread of life to. Oh so few! and that for so short a time. Oh! the greatness of this work! The thousands who are dying every year without God, and without hope. Hundreds of these we shall never see again. At one place a man said, "Yes, we have heard this before. Sixteen years ago a missionary and some men came here and told us this story." Sixteen years! How many dead since then? Oh for shame that the Christian church cannot reach these people oftener. We can, if we will. But will we?

We spent two months, or about that, in this work, then came to take over charge of the English work. I must confess I hated to come back here. I suppose I ought to be ashamed to say so, but I did so want to give my time to the native work. The Lord knows best and if He does not think it best for us to return, the Board does, and so here we are once more.

Dr. and Mrs. Coldren have done a good work here, and as he said in his report last year, we cannot profess to finding things in a wreck, and write reports of the wonderful changes that are taking place. The work was growing and is growing, and we shall have our hands full if we can keep up with the spirit of things, and keep it going until some one else comes.

Every one was sorry to see Dr. and Mrs. Coldren leave this work. They ought to have remained at least another year or two. They could have done better, and the work would have been better than can be expected by the changes that must take place.

We have paid the church debt for the fans and lights and thus are free from debt. We were to have five years to pay off the seven hundred and twenty-three rupees, but in a little over one year we have paid the debt. We hae also voted to pay fifty rupees a month for pastor's salary, and have paid one month's salary. The past year the church has raised Rs. 1202-13-9. the Sunday schools Rs. 134-2-3. and this has been spent for the debt and running expenses of church and Sunday school.

Our prayer meetings have been well attended. In fact the prayer meeting room is about filled most of the time. These services are a great source of comfort and strength to us. We have baptized nine people, and taken sixteen into the church. The church services are well attended. We have a good choir.

Mrs. Roche has been a great help to us in the choir, S. S. and native work. She will report her work, and Mrs. Oxrieder will report her work. May the Lord prosper this work and use us to His glory to the very last. When this report reaches you we will be, if we have not already, laying down this work after eight years and a few months. There have been many

changes, and as we look back, it seems almost too much to believe such changes could have taken place in India, but they are here, and to stay.

Native Work.—I shall leave the report of this work largely to the pastor, Koilas Mahapatra. I have had very little time to give to it. In fact I have done very little. I turned it over to the pastor when I came back from touring. The work is one of the growing works of our field. It has many encouraging features. The people are from all parts of India. Many are far from home and feel as if they were free to do many things they otherwise could not. They are easier to reach, and do not have so many things to keep them from accepting Christ.

The young people of the church are ready to work. The young men conducted all chruch services, while their pastor went with me to the country for cold season work. They also spent their vacation in the country with us, helping to sell books, preach, and sing. They made the long tramps over the rice field, going for miles carrying their musical instruments, praying and singing, and never a grumble. It was a good thing for them and the church as well. We have some very bright fellows in the church and we look forward to their being valuable help some day in the great work of bringing India to Christ.

Our assistant pastor. Priyanath, is from Santipore, just lately graduated from Bible School. He is a bright young fellow, but like many others has much to learn, of consecrating his all to the Lord's work, and to feel the burden of souls resting upon him.

Surendra, who is in the Bible School now, but was with us during the cold season, is a good worker both in school and out. He did splendid work with us last year, always ready and willing, the first out in the morning and the last in at night; always at work in market, village, and by the wayside, getting in a word here, selling a book there, giving a tract in another place. It was a joy to see him work. He never seemed tired. He was our cook for six years, and I had my doubts about him as a preacher when he wanted to go to Bible school; so did the Indian Committee ,and they put his request on the table for a time. But it begins to look as if we as an Indian Committee do not always know it all.

Koilas.—What shall I say; you know him. He is not new, and let me say he has not gone back but has grown. Need I say more. Oh that God would give us more such men, men who want to honor God and lead men to Him. Pray for him. Pray for each of these workers. Pray much. Plead with the Lord for more like the pastor, and that his work may be a success. That he may always keep close to God. That his life may be the means of influencing other young men to dedicate their lives to God and those vast untouched and dying multitudes who sit in darkness and despair on every side.

J. H. OXRIEDER.

REPORT OF MRS. OXRIEDER.

We have been away from Bhimpore so long that I feel rather hazy as to how to report the last three months of 1909. Anyway there is little that differs from last year.

As Champai had at last succeeded in getting a house built at Topaban, he took his family there, thus taking away Singha, one of the Bible-women. Soon after that Annie fell and sprained her ankle, so there were only four women at work at the time I left. One girl went up for the L. P. scholarship examination. She was the only girl in the district to go up, and the inspector assured us that she would receive a scholarship. The Bible-women, teachers, and a number of girls from the school took the Bible examination. They passed very well, nearly all receiving prizes.

We expected the Kennans early in December but owing to an unusually

severe and extended experience of *mal de mer,* they were unable to take charge of the work till January and we found ourselves suddenly face to face with the problem of planning Christmas for a native station. You really can't imagine what this one "big day" means to these people, in the midst of a people where religious holidays are the milestones in life, and among Hindus they come frequently. Then how much must be concentrated in this one day for the native Christians. So they call it "big day." When I would ask any child how long he or she had been in the orphanage, the answer was likely to be how many "for a dens" (big days) they had seen there. So you see it was a problem. We were able to communicate with Dr. Kennan, however, and the result seemed to be satisfactory. Of course there was the tree, and with our family of about one hundred it meant shopping. Besides there were the school children to be given things.

For the boys there were knitted cotton vests, jack knives, small looking glasses, combs, soap, pencils, paper, etc. For the girls the same, except that there was print for jackets instead of the vests.

For days we were busy selling paper and pencils, which were the chief gifts exchanged among the students.

To us it was a strange sight to see the tree loaded with *saris,* jackets, *dhuties,* bottles of oil, rolls of paper, packages of country sweets, chickens, eggs, vegetables, garlands of flowers etc.

We received chickens, eggs, several large radishes, sweets, and garlands of flowers.

Altogether it was a Christmas that will always stand out in my memory as a unique experience.

Very soon after we bade goodbye to the people whom we had learned to love so well in one short year, climbed into the big house garry for the last time (I'll tell you about that garry when I get home), and were off.

When we first came to Khargpur, the Coldrens were still here. My husband went out at once into the country, and I took the opportunity to visit the native Christian women. Most of them spoke languages which I could not understand, but with Johori to interpret for me, I enjoyed seeing them, and they seemed pleased to see me.

I attended the women's prayer meeting also, but found it rather a difficult meeting to conduct. There were five or six different languages represented. Two or three sang in Oriya, I read and talked in Bengali, and each prayed in her own language. I am not sure but that it sounds more interesting than it really was. At least, I am sure an English woman would say, "How interesting!"

After it became hot, I had to give that up, as it is about one and a half miles from here, and the only practicable time was 3 o'clock.

There are about 16 children in the girls' school. Indu, the pastor's wife, is a faithful and efficient teacher, but there are too many languages here to have a large girls' school.

The English work has been the usual round of visits and church services. We have found much that is encouraging, and it seems to shine out brighter after a year of absence. I think we ca ntruly say that our last year is our best.

Mrs. Roche has been of great help to us in both English and native work.

The S. S. has kept up in interest and numbers. The present enrollment is about 112. Mr. Rothwell continues as superintendent. Miss Moore, who was treasurer for some years, has gone away to work in the M. E. mission. Mr. Loader takes her place.

Following this S. S. a number of us go to the North Side and have S. S. with the poorer people in their school house. The children look forward to it from week to week, and are most enthusiastic.

We are planning to have a children's day program soon, in which both schools will join.

We hape a Band of Hope of about 40 members. One girl has not missed a single meeting, and one other only one.

We are studying Taylor's "Effects of Alcohol on the Human System." We feel that this does indeed mean hope for the future, in this land where alcohol is considered a necessity by so many.

C. M. F. Oxrieder.

REPORT OF KAILAS CHUNDRA MAHAPATRA.

Again we are at the end of another year, and as it is necessary to send a report, I write the following lines with a cheerful heart. We have passed through another year by the blessing of the Almighty. The Lord has protected us from all evils, and enabled us to carry on His work with courage and enthusiasm. Sometimes when I think of Karagpur and its rapidly growing population, when I see thousands around me, and the magnitude of our work, it often comes to my mind, "what can five poor workers do amongst so many?" But on the other hand, when I think of our Lord's infinite power and wisdom, then I feel convinced that this seemingly great work is His in reality and it is He who is working through us and therefore it is only incumbent on us to be obedient to His will.

Kharagpur Native Church.—Five years ago, when I came here as a pastor, I found that there was hardly any life i nthe church. But since then in these few years the Lord has infused new life into it, year by year, making it grow in spirit. The church now understands its duty towards Him. Last year the church contributed five rupees per month towards the pastor's salary, and there were three additions by baptism. One of these was from a Hindu family. Undoubtedly the spirtiual life of the members is progressing. Prayer meetings and Sunday services were regularly held throughout the year. The congregation now numbers 92.

Sunday School.—There are now sixteen pupils in our Sunday school. They learn the Catechism, the ten commandments, the Lord's Prayer and the Life of Christ.

C. E. Society.—This work is going on very satisfactorily. The young men of the society hold house-to-house prayer meetings every day of the week. Many of them help me in the church work also. I am happy to report that the society has done its duty and good work.

Evangelistic Work.—Last year the congregation gave me leave of one month for this work and the young men of the C. E. took up my work in my absence. Besides many of them on their holidays came out to us and helped a good deal. Mr. Oxrieder, two preachers and myself were out in the country for 26 days and succeeded in selling about 20 rupees' worth of Gospels. I refrain from a report of our preacihng, as I am sure Mr. Oxrieder will send an account of it in his report.

In conclusion I beg to offer my thanks to all our well wishers and to those who contribute towards our support, and request them to remember us in their prayers to our Lord and Master.

Kailas Ch. Mahapatra.

REPORT OF MRS. ROCHE.

My work is mainly among the native women of the railway and the workshop staff. But very often men flock around to hear us when we are in the open.

Since I began my work, I have found nearly all the homes very willing to let us in, and we seldom meet with opposition. What we do meet comes mostly from Mohammedans. Sometimes their women begin to argue about Christ. Once when admitted to one of these homes, which we had

visited before, the husband was at home. He was very civil to us, and thought that we had come to doctor his wife, who was not well at the time. After the Bible-women had told her what to take, we sang a hymn, "O Happy Day," in Hindi. But when we began to read the Bible, he said, "Oh, that is quite enough! Now stop!" The women were afraid, so we very quietly wished them good day and left. While we were going away, we heard him scolding the women for letting us in.

It is only once in a while that we meet this kind of people. On the whole we have much to thank God for. The people are getting to know us better, and always tell us to come again soon, as they love to hear us talk about God.

It takes nearly two months and a half to go all round, so that we do not get to see them as often as we would wish to. They often tell us, "Oh, how long since you were here!"

What has grieved me most is to see how utterly ignorant these poor people, and espcially the women, are as to what sin is. They tell us, "But I don't sin!" And they seem quite stunned when told that we are all sinners.

Another sad thing is to see what sad lives these poor women live, and it makes one's heart ache to think that they do not know where to find the source of all comfort in times of sorrow and trial, but must go groping on in the darkness. But they seem to grow quite hardened to it.

We visit from four to seven houses nearly every day. Sometimes we have as many as eleven or twelve, or even seventeen hearers. Thus there are often thirty or forty seen in a day. The total from the 1st of February to the 31st of August was 1,514.

There is one Hindu man who will, I believe, come out for Christ. When we spoke to him about his women not learning to read, he said, "Mdam, what are we to do? Our forefathers have kept us in ignorance from our childhood about these things, and it is hard now to make our wives understand."

Let us pray that God will open their understanding and enlighten their minds to receive the truth. And may we not claim his promise that "His word shall not return to him void?"

Report of Rev. H. E. Wyman.

I began the year with the transfer of some of my burdens to the willing shoulders of Bro. Sachidananda Rai. He was willing to make the experiment of taking the oversight of the work in the out-stations, of the preachers and the colporter, and to look after the paying of their salaries. This saved me a lot of time and trouble, and relieved me of some accounts. The experiment proved such a success that I asked that this portion of the work be assigned to him by the Indian Committee which was done. He will therefore report that part of the work. His appointment has made the work and the position of missionary to be better understood by the brethren, and has, I think, tended to draw us nearer to our native ministry. They seem to appreciate our burdens to a greater extent, and seem to more anxious to help us solve some of the problems.

Cold Season Tour.—I was able to make an extended trip in the mission boat "Indiana," covering forty-five days, with only one break when I had to come in to distribute the remittance from home. With three evangelists and a colporter we worked down the Midnapore canal to the Rupnarian river. Then with Udoy Jana and Amrit Maity I went up that river as far as Ghatal, visiting all of the markets and important villages along the way, preaching, selling books, showing the magic lantern pictures of the Life of Christ and doing all the personal work that was possible in the mean time. The territory covered has been little worked and some of the people up the river could not remember any previous visit of a preacher or missionary. Some of the people had come in contact with Christian workers in Midnapore or Contai and Calcutta; but to the most it was a new story in which they were interested, but to which they were not prepared to commit themselves. One community wanted a missionary and his wife, or a lady to work with their women, or at least an educated Christian teacher and his wife to come and live with them. I had sorrowfully to tell them at present we could send them none of these. Books and tracts were in good demand. The work ought to be followed up by another visit next year, but it seems to me that the next trip will have to be up he river that lies in the western part of our field, whose banks have many places that have not been visited for years by the workers of the Bengali department; and the Lord willing I intend to make that trip this next cold season.

The Bible School.—As I anticipated in my last report, the three young men, Udoy Jana, Umesh Dee, and Priyanath Set, graduated, and have been

engaged in the work of the ministry during the last year. Umesh De and Udoy Jana stepped into the vacancy in the work at Chundrakona, and their work Bro. Sachi will report. As no new students came in at the beginning of the new year, we had but the six previously on the rolls. However we were joined during the year by Bro. Behary Lal Das who has taken examinations in Theology and Minor Prophets, in addition to his work as head master of the Boys' Middle English school, and has done well in both departments. He intends to fit himself for greater usefulness in the Lord's work. Arat Misra and Surendra have proved to be hard-working students, in spite of their age and lack of previous opportunities. The various new rules in regard to the Bible school and the students, and the great care used in the selection of the candidates, has kept down the number of the students. But we expect that the Lord will not allow that the school shall languish after the hard and good work that it has done in preparing the preachers of our mission. Brother Samuel Das and Bro. Rai have done excellent work in the school, but brother Rai has had to work in the face of great bodily weakness that he tried manfully to cure and overcome. This year I have had charge of four classes the most of the time, and three all of the time. I have had a class in Theology and in the historical, poetical and prophetical books of the Bible.

Bazar preaching has been sustained by Bros. Rai and Das, and Evangelist Amrit Maity, and the Bible School students.

The bazar Sunday schools have been visited by Bros. Amrit Maity and Joseph Charles, the inspector of the village schools.

Preachers' Examination.—Twenty-three preachers took the examination last year, and eighteen passed. Of those who passed twelve obtained the numbers required to secure a prize. The course has been continued for the present year with the same studies continued.

The Boys' Band.—In the village work I have had a Sunday school class and have had the honor of helping the boys' band of the "Reds and the Blues" to keep up a series of weekly meetings. There are twenty boys in these bands. They wanted to have a religious service of their own, and wanted me to help them. This I consented to do if they would agree to look well after the attendance and the order in the meetings. This they consented to do and they have succeeded admirably. The contests in committing the names of the books of the Bible, Bible passages and hymns, has been very interesting and sometimes even exciting. They have entered into the work with such hearty good will that it has been a pleasure to me to spend the time to find something of interest to throw light on some passages of Scripture that had been read by one of the boys.

Odds and Ends of Work.—These have been numerous during the year. Including a trip to Chandbali to settle Bro. Charles Sinha in his work of superintendent there, and a visit to one of the Santal out-stations to help settle a law suit about land. About every week someone of the afflicted brethren have visited me to get legal advice or financial help to enable them to hold their property from the rapacious heathen about them. These petitions and cases have caused me many heart-aches and much trouble. But an occasional victory has cheered my heart, and kept my courage up.

The scarcity of missionaries is having a discouraging effect on our work. The people are saying that the mission will last but a few years, or until the rest of the Sahibs go home, and then it will stop. This tends to discourage some of the weak ones among our young men who had been thinking about entering mission work. On the other hand we have others who are manufully facing the problem of self-support, and praying for strength and guidance. The work would not totally stop if we should all return now; but a large reinforcement to our mission staff would not hinder the pushing of self-support, but could be made, I think, a great help in that direction. The child learning to walk likes a helping hand. The presence of a good band of missionaries would give them confidence.

H. E. WYMAN.

REPORT OF MRS. H. E. WYMAN.

Raw Heathenism.—How I wish that we missionaries might make this report just speak to the hearts of the workers at home, until they could see the lights and shadows of our work, and realize how needy are the souls about us, and how precious they are in the sight of the Lord! Then young hearts would be turning to India, and the great need of more missionaries would be met.

We have had many experiences during the past year that have shown us the need and the power of the Gospel among these people. I will just give an example. Last September the child of one of our Santal servants was stricken with cholera, and although I and my husband tried our best to save him, in a few hours he was dead. The name of the father is Bhim, and he has worked for the missionaries for a long time. His wife thought that some witch had eaten the life of the child, and she wanted to go away at once. But Bhim said that he believed that the Lord had taken the little one to heaven. I talked with the mother, and tried to show her that God knew best, and had taken her child to be with Him, but she said: "God is good, loving and kind, and He would not do anything of this kind; but some evil witch has done it while the Lord was not looking; and I am not going to stay here and have my two little girls eaten too. So she took them away to the jungle and lived with her brother. Bhim went after her and remained a time, but had to come back to his work as the money had given out. In the meantime he decided to become a Christian. He tried to persuade his wife to come back and live with him and be a Christian too. She came back and stayed a short time but was not contented, and seemed to be afraid all of the time. She finally took the two girls and went away and did not come back. Bhim was very sorry, as he loved his family. The two little girls did not want to go. They were going to school and kindergarten and enjoyed them very much. After he found that his wife was determined not to come back, he decided to be baptized and join our Midnapore church. He has proved to be a happy Christian. The Santals believe in witches, and an old woman belonging to Bhim's family was recently tried by the village council for being a witch, and the people with whom she lives were fined for keeping her, and she ran away, or at least, it is so reported. But she maay have been murdered. The only reason for accusing her seemed to be that she was a very aged widow. There was recently a case in the Midnapore court against some Santals who had murdered a man for harboring a witch. They were convicted and transported for life.

The Cold Season Work.—The work was very pleasant on account of the boat "Indiana." It was much easier to live in the boat than in tents, where we have to break camp every few miles. Lena, our daughter, enjoyed the boat life very much, and she was much pleased with the many questions asked concerning her when we visted the women in their homes. One woman asked if she was my "Bo," meaning daughter-in-law. Another asked if she was my sister. They were much interested in our life in the boat; and while Mr. Wyman was away with the preachers, they would gather around the boat and ask many questions. The women along the canal and the Rupnarian river are more used to being out in public, and would gather around the preachers to listen to the preaching of the Gospel, and would ask for tracts to take home to their children. One morning a party of Hindus went by the boat attending an idol that was being carried by a Brahmin. The idol was of clay, painted red. The Brahmin who carried it so held it with his hand at the back that he was able to make the idol wave its right

hand. The people from many villages, men, women and children, came running and prostrated themselves on the sides of the path as the idol passed.

Girls' School.—Our Rachel, Mrs. Bose, has been most faithful in her efforts for the good of the girls in the school. The results have been very satisfactory. She and I have visited the parents of the pupils in the Mohammedan and Hindu homes. We have two bright girls from the Mohammedan home where the Zenana work was first started so many years ago. I helped care for the mother of the eldest of the Hindu girls coming to the school when the girl was a small baby. She is now a bright student in the school, and is learning to make pillow-lace and getting on very nicely.

Bible Classes.—These classes with the women have been a great comfort during the year. There have been nine women in the two classes, and they have been very prompt and faithful in the class work. In last year's report I mentioned eleven as planning to take the examination. At the time two were ill and not able to take it. Of the ten who took the examination all passed, one getting first prize, one second prize, and five getting third prizes.

Indusrial Work.—The pillow-lace work has gone on during the year. Six girls have been learning and can make four or five patterns of lace and insertion. I have sent home some samples for sale. The handkerchief work has gone on through the year. I have been able to help some needy widows with this work. A young girl left a widow last year has learned to do very nice work. After they have learned they are always willing to teach some one else. They seem to be hpapy to have this work in their homes.

In addition to my home duties I have had a Sunday-school class of young women and have tried to visit the women in the village as much as possible. Lena has been in her school in the hills nine months of the year. She is working hard and getting on as well as could be expected in her studies. The three months of vacation were very short indeed. Yet we rejoiced that we could have her with us that little time.

GERTRUDE M. WYMAN.

REPORT OF SACHIDANANDA RAI.

Preachers.—I have charge of two different kinds of work. One is my usual pastorship of the Midnapore church, and the other is the supervision of the Bengali out-stations of the evangelistic staff has been given to me by the Indian Committee. This staff consists of seven preachers and one colporter. There are three out-stations, Chundrakona, where Udoy Jena and Umesh Chundra De are located; Satbankura, where Chundra Kanta Mishra is located; and Belda, where Surendra Mujumdar is stationed. Amrit Lal Mahiti is located at Midnapore as my assistant, by permission of the committee. The other two are working in the nearby Santal villages, and looking after some Santal converts. The colporter, James Bapniah, worked mostly in the town. These men are all doing fair work in their places, though some are doing better than others, because all are not equally gifted.

They go to preach in the surrounding villages and markets, and they sell Christian books and distribute tracts in the markets and festival places. I occasionally go to visit these places, and sometimes send my assistant. Though I have not been able to go quite often on account of ill health and of other work, yet as many times as I went, I enjoyed the work, and had a pleasant time with the workers, and also found that the attitude of the Hindus is quite encouraging.

At Chundrakona a lower primary school has been started during the year for the boys and girls of the heathen. A preacher's wife is teaching this school, and also giving religious instruction to the children.

Belda is a new station in the southern end of the district. It has been occupied only last year. It is a very important place for work. It is half way between Midnapore and Contai.

The street preaching here in Midnapore has been regularly carried on by the Bible school students and Amrit. Amrit is doing other work also, very gladly and cheerfully, as I ask him to do it. The colporter made good sales of books for some time here in town. But he, being an unsteady young man, turned his face toward some other work, so I dropped him last month.

These workers went on some preaching tours in bands last cold season. One band went with Mr. Wyman, and another by themselves. Thus the work has been carried on during the last year.

Though this work is not quite new to me, yet the full charge of it is somewhat new. But by the grace of God it has been carried on without any difficulty. May God bless the work that has been done in His name by these preachers last year.

Church.—On account of illness I have not been able to do all the necessary work of the church as I had been doing before. I have been kept from the pulpit for four months, two months last cold season, and two months during the rains. Still the work has been carried on just as well without much difficulty. The pulpit was mostly supplied by Mr. Wyman. He did it most gladly in addition to his other work. My assistant helped me in other necessary work. All the religious meetings and services have been regularly kept up. Members have been added by baptism and in other ways. Though there was some coldness and indifference among our members for a time, praise God! it has disappeared now. A new enthusiasm is seen in many for the house of God. They are at work now, trying their best to keep up the purity of the church and community.

A new missionary spirit is taking hold of the church members. Some of our leading men seem to realize the need of the missionary movement in our native churches, and they have made up their minds to help it. The church members are gladly paying as they promised to pay for the rebuilding of our church. More than a thousand rupees will be raised within two years.

Three Hindus have been baptized this year. One of them is a young man of higher caste; another is a servant of Mr. Wyman. He was a seeker for a long time, but had not courage enough to come out. This year he boldly came out, and for this he had to sacrifice some.

There is a small number of stubborn backsliders in the church. They are a very great drawback to the work. There have been many good and blessed revival meetings held in our church at different times, but strange to say, these did not turn their faces to the Lord. We are praying for them for a long time. Reader, pray for them, and for us also.

S. A. RAI.

REPORT OF MRS. AGER.

Schools.—This work was given over to me by Dr. M. W. Bacheler May 1st. There are now twelve schools, numbering 357 scholars, boys and girls. By the books I see that Surendra Nath Patra, mentioned in last year's report, was dismissed in March. In April Suddhakar Mahanty started a new school at Santagaria, a place about a mile from Midnapore, among some people of aboriginal stock. So far good work has been done in this school. Gopal Chundra Das is working with interest and success at Mirza Bazar; but Mohendra Nath Das at Komalgola has fallen off in his work, and lacks energy, so that, unless he improves, I shall be compelled to dismiss him.

The remaining nine schools are doing well. Some of the schools are visited Sunday morning for Sunday school, while others are taught the

lesson on Saturday. A book called "The Shepherd King" is used in these schools for Sunday school purposes.

The last Saturday in each month the teachers come for their pay; and at this time they take an examination in the Bible, and a manual is read by the pundits to help them to know how and what to teach their scholars.

Joseph Charles is still acting as Mission school inspector, and is doing well.

The children in all the schools are taught the "Little Book" (catechism-and the temperance catechism, and prizes are given semi-annually, in October and April.

Sunday Morning Class.—I have a class for little ones every Sunday morning, and thus help the mothers to attend church without having to take them, too; and it makes the services quieter. There are 23 on the roll, with an average attendance of 19. Once a quarter we have an afternoon of fun and play, ending up with cakes, sweets, and lemonade, and closing with prayer.

S. M. AGER.

REPORT OF THE GIRLS' MIDDLE ENGLISH SCHOOL.

The attendance of the girls has been better this year, and the Mohammedan girls from a respectable family, as well as high caste respectable Hindu girls, are coming regularly. Again the place of the second teacher was left vacant, as she was to go to Chandrakona with her husband, and the vacancy was filled up immediately by a pupil of this school who holds the certificate of passing the sixth standard examinations last year. She is doing well with her classes. Pillow-lace making has been introduced in the school, and the girls are enjoying making the laces.

The remarks of the School Inspectress, who visited us the last week in July were good, and two candidates were selected by her to compete at the scholarship examination, as the public examinations have been stopped. The "Life of Christ" is the regular course of study this year, the children have this, singing and prayer before opening the school. To encourage the girls, a prize distribution was held at Christmas time, at which the Station Magistrate and his wife, as well as the ladies of our station, were present. They were pleased to hear the recitation of poetry and hymns, sung both in Bengali and English, as well as songs sung by the kindergarten children.

RACHEL BOSE.

BOYS' MIDDLE ENGLISH SCHOOL.

We have four Christian and two Hindu teachers. Only a few weeks ago there were 101 boys on the rolls. But lately a Madrassah and a Pathsala being opened at a little way off from the school, the number of pupils has fallen off to some extent. At present there are 92 boys on the rolls. Of these 31 are Hindus, 31 Mohammedans, 21 Christians, and 9 Santals. I am glad to state that some of those who left the school have come back, and we hope to get some new boys soon. So ere long we shall be able to make up for those who have left us. During the year the monthly average roll number and average daily attendance have been 95 and 75.5, respectively.

At our last annual examination, held two weeks before Christmas, 1909, 97 boys appeared, of whom 49 were promoted. Christian boys intending to have higher education are sent to our high school at Balasore.

Every day before the commencement of our regular work we have a service for about 15 minutes. The boys assemble in three different places. They recite Ten Commandments, Beatitudes, chapters of the Book of Psalms and other select portions of the scriptures. Then the Christian teacher offers a short prayer, after which all join in the Lord's prayer. The boys are then dismissed to go to their own classes. In addition to these, regular Bible instruction is given in all the classes.

The school has been making good progress with its work, and I have strong hopes that it will continue to do so. During this year the inpsector of schools, Burdwan division, assistant inspector of schools and other departmental visitors, visited the school, and were much pleased with the discipline, progress and general condition of the school.

BEHARI LAL DAS.

REPORT OF MISS COOMBS.

I have just been reading the report I wrote last year, and am wicked enough to think of the possibility of copying that for this year. I wonder if any one would notice it was the same. I have a suspicion that missionaries' annual reports are not very widely read, and are of much more interest to those who write them than to any one else. However they are among the must-be-dones, so here goes.

Zenana Work.—Five days in the week (and six days for school teachers) and forty-three weeks in the year our teachers—both zenana and school—with the Bible--women and the old women as well, who go along to call the girls to the schools and see them safely home, all gather on our veranda to have the roll called, to see if anyone is unable to go, and arrange for the work of my absentee, to give out books for which the money has been sent, to take fees and then to start off together, being dismissed with prayer. There are twenty-one of them and it requires five garrys to take them all their various ways. One garry takes only the two Bible-women as they go here and there irrespective of the teachers and their work. I have been able to secure a zenana teacher in place of the one given to the schools last year but have kept her as "a spare hand," for among so many, some one of the band nearly every day is likely to be kept at home by sickness, either her own or that of some of the family. This tendency to ill health is a great hindrance to our work, and one of the things to which it has been very hard to become reconciled. Brought up in a sturdy New England family, where a doctor was seldom seen from one year's end to another, the lack of vitality to resist disease has been painful to witness.

The Government Inspectress of Schools and Zenanas has not visited us this year, but her assistant spent some days lately in inspecting the zenana work, and her "remarks" left in the visitors' book read on this wise—"I am extremely pleased with the result of my inspection. A great improvement has been made in figures since I visited this work last. Most of the pupils have learned to read, write and spell, and some of them can work out simple sums in addition and subtraction. The teachers deserve great praise for faithfully doing their work, as the examination results show."

This same assistant inspectress is an object lesson in proof of what Christian teaching has done for women in Bengal. Herself a dainty Bengali, unmarried Christian lady, she goes about her duties as a Government official with quiet dignity. She is, however, well, protected, for an elderly woman stops with her wherever she puts up, and a dignified man-servant accompanies her on the streets.

I called today on a pupil of long ago—a widow who used, in those days, to remind me so much of a caged bird constantly by fluttering against its bars. She has since been able to try her wings as a Brahma widow teacher in a school in Calcutta, and very animatedly told me of her classes and their advancement. I reminded her of the time when she was longing to do something outside the walls of her own home, and she said, "Yes, God has been very good to me."

One of my former pupils died this year, and her mother seemed greatly comforted by the prayer offered when I visited her and by the hymns sung. She urged me to come again, and to get her a book with those

hymns, saying they made her heart feel lighter. Much the same circumstances were experienced when visiting a former pupil after the death of her husband, showing the remembrance and appreciation of the teachings of other days. It is "as cold water to a thirsty soul" to find these appreciative ones, for many of our pupils seem to take the religious teaching as something to be endured for the sake of the secular teaching that accompanies it, but they all enjoy the hymns.

The Girls' Schools have not so many names on their rolls, for I have weeded out those that were but names, and have fixed a limit to the age of the tots that may be sent just "to learn to sit." The crippled teacher of whom I spoke in last year's report, has a helper now, supplied most unexpectedly by a *protege* of my own who had been in school for years, but was sent home (or back to me) as it was not thought profitable to keep her longer. I set her to work at once, and she is doing very well. One of the girls in another school is to appear at the Government scholarship examination in December—a great victory over Hindu prejudices.

My Santal Sunday School is still a pleasure and now numbers twenty-seven. They have no penny contribution, but they have brought woven strips of date-palm leaves to make a mat on which to sit, and this, for them, is as much as the carpeting of some S. S. vestry at home for more favored ones. A few days ago I met one of the little girls of this school with tear-red eyes, and she wanted me to go and see her father, who was perhaps dying. I went and found him unoconscious, and evidently near his end. I talked with the mother and afterward prayed with them, and though the man was too near the river to know, and the mother too overwhelmed with sorrow to care, yet the little girl was comforted.

Temperance Work.—In connection with the W. C. T. U.—National, divisional, and local, has taken a portion of my time, but I consider it legitimate missionary work, for the idea is far too widely spread in this country that Christianity is a religion which allows and advocates the drinking of intoxicants, and as missionaries we should do all in our power to combat this idea.

L. C. Coombs.

Africa

FORTVILLE, GRAND BASSA, LIBERIA.

Rev. Lewis P. Clinton, Missionary. E. J. Lucas, Asst. Missionary.

Our African Mission consists of two teachers, Lewis P. Clinton, Principal; E. J. Lucas, Assistant, and a colored woman matron ,who has the care of the girls and does the cooking. Mr. Lucas is thirty-six years old, single, formerly from Mississippi; went to South Africa at the time of the Boer War; was not permitted to land; returned as far as Liverpool, and from there came to Monrovia, and taught Government school for Congo children; from there he came to Fortville to teach Pessch school, where Clinton first found him; thence he went to Buchanan, where Clinton kept in close touch through correspondence. Lucas came to the African Mission in 1908, one year after Peabody left. Lucas teaches the young children, boys and girls, and looks after the farm, takes the boys out on the farm and oversees their work. All the boys work on the farm except those who work at a trade. They work from 12:00 noon until 5:30 p. m. without remuneration except their keep. The girls learn to sew, wash, cook and keep house. The hours of study are from 6:00 a. m. to 11:30 a. m.

While Mr. Clinton is absent Lucas is left with twenty-three boys and eleven girls, all the way from five to fifteen years old, except the boy Lewis, who is eighteen. The girls are from five to nine years of age. In the country the girls are generally sold by their parents for four leopard's teeth, a cow, and $100.00 in merchandise. Mr. Clinton does not buy his girls in this way for the school, but through the good offices of his friends the consent of their parents is secured, and they become his children with full responsibility. These children are taught reading, spelling, writing arithmetic, geography, English grammar, and a Bible lesson two hours each day. They are permitted to finish and go out when they can lead an independent Christian life, but do not go actually, that is, they do not leave the mission, but remain somewhere on the 200 acres of land which he has leased from the Government. While Mr. Clinton has at present only 200 acres of land, he is entitled to 600 acres, which he will probably secure as there may be need. Neither Mr. Clinton nor his assistant leaves the mission for cold season work. They do not do evangelistic work among the surrounding tribes, but many hundreds of the heathen come to visit the school and there learn many things.

Our mission is 70 degrees north of the equator; thermometer stands at 90 and 95 degrees the year around, 60 degrees being the lowest. There is a rainy season of six months, which culminates in July, August and September, in which the land is drenched. Summer begins the 15th of October and crops are planted the year around, any month of the year.

Liberia is a Republican form of government. The American negro rules the land. The feeling is strong between the native negro and the American negro. The President of the Liberian Republic is Hon. Arthur Barkley. The United States Minister is Ernest Lyon, Monrovia, Liberia.

Clinton has for his use about $700.00 a year. Out of that $300.00 goes to Lucas and the balance Mr. Clinton uses for the general expenses of the mission, feeding and clothing children, and affirms that he uses little or none of this amount for his own personal expenses. The people of the mission feed upon cassava and fish in the morning, and lunch upon rice and fish at dinner, two meals a day.

The Sabbath Day Exercises.—Morning, Prayer Service; read the Bible, all sitting in a circle. Explanation and Exegesis. Repeat the ten commandments. Apostles' creed. Prayer and singing.

Books from the Press of the American Baptist Publication Society

The Living Atonement

By J. B. Champion, M. A., D. D.

The work will impress any one as that of a scholarly man, earnest in search of the absolute truth. It is a work that no student can afford to ignore, and one that the more it is studied will prove itself to be an important contribution to the discussion of a vital theme.

Price $1.25

The Gospel at Work in Modern Life

By Rev. Robert Whitaker

This book is unusually striking and important. It is an epoch-making message. Men and women who read this book will come to a new view of life, will have higher ideals of Christian obligations, and will experience a new stimulus in Christian service that will make life more worth while forever.

Price 50 cents net

Men of Mark in Modern Missions

By Howard B. Grose, D. D.

This booklet will be welcomed as another issue of the Forward Movement Mission Series, several numbers of which have already appeared.

Price 15 cents net; postpaid, 18 cents

The Social Gospel

By Prof. Shailer Mathews

The purpose of this book is to set forth the social teachings of Jesus and his apostles.

Price 50 cents net

The Old Testament Among the Semitic Religions

By Prof. Geo. R. Berry

It is a book that all students will want. It is historical and not dogmatic, and hence demands the attention of all who would be exponents of the truth.

Price $1.00 net

1701-1703 CHESTNUT STREET PHILADELPHIA

The Organ in the Free Will Baptist church, at Hillsdale, Mich., built by the celebrated firm of Hook & Hastings Co. of Boston, Mass., was exhibited at the St. Louis World's Fair Exposition, where it received the Grand Prize over all competition for highest excellence.

THE WORLD'S FAMOUS

Folding Organ

Manufactured by

Bilhorn Bros.

We are now building them with a water proof seal grained leatherette-covered case as well as in three-ply oak veneered case. These organs are in advance of anything of their kind. They meet every requirement and are indispensable to CHURCHES, MINISTERS, MISSIONARIES, YOUNG PEOPLE'S WORK and Y. M. C. A. SHOP MEETINGS.

A postal-card will bring you all particulars.

BILHORN BROTHERS,

152 Lake St., CHICAGO, ILL.
